

An aerial, stylized illustration of a city. In the upper left, a large, textured dome structure is visible. Below it, a multi-story building with a blue roof and yellow-green facade stands. To the right, a blue and yellow high-speed train is on a track. In the lower right, a blue police box is prominent. The overall scene is viewed from an elevated perspective.

Dublin 2019 thanks the DC in 2021 Worldcon Bid for their generous support for our Staff Lounges in memory of Peggy Rae Sapienza, the Chair of Buccaneer, the 1998 Worldcon in Baltimore, Maryland, and a champion of volunteers everywhere.

# Martin's

Martin Hoare's Bar – known as Martin's

A few weeks ago the Dublin 2019 Committee learnt of the untimely death of Martin Hoare, who was to have been the Fan Bar Manager in Dublin. Martin will be greatly missed by Irish, UK, and Worldcon fandom where his knowledge about good beer was unparalleled. But especially by Irish fandom who had adopted this Englishman and made him an important part of the Irish National Convention – Octocon.

In memory of Martin's contribution to Irish Fandom and his wider impact the Dublin Committee think it only appropriate that the Fan Bar in Liffey-A should be named in his honour. Which is why you'll no longer find a reference to a Fan Bar at Dublin, but to references to Martin's Bar, where we hope you'll have a drink in his memory.

# Dublin 2019 Code of Conduct

---

**We want to steer our convention so that a positive space and strong community emerges from the beginning.**

Dublin 2019 aims to build a community for all fans, and Codes of Conduct (COC) help to make an inclusive community. With that in mind, please take a moment to review our Code of Conduct and Anti-Harassment Policy.

Codes of Conduct and Anti-Harassment Policies enable, guide, and encourage safe and secure relationships between convention Attendees. They help to make conventions a safer space by discouraging anti-social behaviour and helping everyone to feel comfortable.

This Code applies to all Dublin 2019 Attendees. Attendees includes Committee, Staff, Volunteers and Members, and all others trading, exhibiting and otherwise participating. We will also expect those working for the Convention Centre and all Dublin 2019 venues to act, and to be treated, in line with the principles of this Code of Conduct.

You will find references to our Listener Team throughout this Code of Conduct. The Listener Team is a group of people whose mandate is to receive reports on potential violations of the Code of Conduct. They can escalate issues appropriately, discuss them in a totally confidential manner, and/or act as mediators, according to the wishes of the person raising the issue.

More COC details may be added, particularly identifying our Listener Team and Volunteers and where to find them during the convention. For more information, see [Dublin2019.com/about/policies](http://Dublin2019.com/about/policies).

## How Can I Help?

- Read and follow this Code of Conduct. Ask your friends to read it as well.
- Support others – if you see someone who looks like they need help, ask if they're ok or engage a Volunteer.
- Ask first! The easiest way to avoid issues is to check before doing something, and it only takes a second.
- Remember that the Attendees of Dublin 2019 come from all over the world; cross-cultural misunderstanding can easily happen, so consider this in your humour and interactions, both online and in-person.
- Consider joining our Volunteer team by emailing us at [volunteer@dublin2019.com](mailto:volunteer@dublin2019.com) or filling out this form.

## Expectations and Policy

Everyone involved with Dublin 2019 is expected to show respect towards the convention Attendees, as well as venue staff, the general public, and the various communities associated with the convention. This is a family-friendly convention; children will be present at many events and in open spaces, so please consider this in your conduct.

Dublin 2019 is dedicated to providing a harassment-free convention experience for all Attendees, regardless of ethnicity, gender identity and expression, sexual identity or sexual orientation, neurodiversity, disability, physical ability or appearance, race, age, religion, or fiction/fandom preferences (this list is not exhaustive).

We do not tolerate harassment of convention Attendees in any form. Behaviour that will be considered harassment includes, but is not limited to:

- Intimidation, stalking, or following
- Unwelcome physical contact
- Unwelcome sexual attention
- Comments intended to belittle, offend, or cause discomfort
- Photographing or videoing members without their consent
- Treating cosplay/costumes as consent for contact or interaction
- Sustained disruption of talks or other events
- Sexually graphic or otherwise inappropriate images in public spaces
- Advocating for, or encouraging, any of the above behaviour

# Dublin 2019 Code of Conduct

---

We require Attendees to follow this code in online interactions with the convention (including the Volunteer mailings, wiki, and other online facilities), at all convention venues and convention-related social activities. In addition, we are bound by Irish Equality Law, which can be viewed here.

Attendees who are asked to stop any harassing behavior must comply immediately.

## Anti-Racism Statement

Racism is on the rise across all sections of society: in sports and the media, in politics, and in our own fandom communities. Dublin 2019 is committed to being as close to oppression free as possible, and central to this is our policy on racism, including prejudice, bias, the expression of privilege, aggressions, and microaggressions. This includes contributions made in discussion sessions and also things said to and about other Dublin 2019 Attendees.

At Dublin 2019 we want to ensure no one is talked over, ignored, or dismissed, and we are committed to making Dublin 2019 as accessible as we can to people from all racial and ethnic backgrounds. Problems non-white Attendees of fandom events often reference include, but are not limited to:

- Having their lived experiences dismissed
- Being expected to be an authority on non-white characters in various fandoms
- Being talked down to or assumed to be less knowledgeable about topics being discussed
- People critiquing their cosplay costumes without being asked
- A presumption by some members of fandom that people of colour do not belong in fandom and that they should not be centered in storytelling
- The use of Social Justice Warrior or SJW as a pejorative term meant to demean or belittle the idea of diversity and inclusion in fandom and storytelling
- The use of social media to target people of colour and allies for harassment and abuse as an outgrowth of their participation in panels, discussions, or when commenting on their participation in fandom
- Being targeted in person or through social media with acts of aggression, harassment, or retribution for calling out harassers and abusive behavior

This sort of behaviour will not be tolerated at Dublin 2019.

*(For full disclosure, this statement on racism was not written by a person of colour, but was edited and reviewed by several people of colour within the fandom community. However, if anyone with personal experience with racism would like to share suggestions for or criticisms of this Code of Conduct, please contact us at [coc@dublin2019.com](mailto:coc@dublin2019.com).)*

## Reporting

Before the convention: You can report harassment or other Code of Conduct violations by email to [coc@dublin2019.com](mailto:coc@dublin2019.com). This address will be continuously monitored by our Listener Team both prior to, and for the duration of Dublin 2019. Or call +353 87 342 4160 (24/7).

At the convention: If someone has harassed you or breached this Code of Conduct in any way, or if you have witnessed or become aware that harassment or a Code of Conduct breach has taken place, please ask that person or persons to stop – as long as it is safe to do so and if you feel comfortable enough to make the request. To help us identify patterns of behaviour and possible repeat offenders, we would be grateful if you would also report the harassment as set out below.

If you do not want to speak to the person(s) directly, or if you engage with them and the harassment or Code of Conduct breach does not stop, please report the issue as soon as possible to a Volunteer Member or Listener Team Member. They can be identified at the convention by their

Listener ribbons. There will be a staffed Listener Desk near the Info Desk at the convention and you can also ask any member of Dublin 2019 staff to call a Listener. Alternatively, you can report by email to coc@dublin2019.com. This address will be continuously monitored by our Listener Team before, during, and after Dublin 2019.

Harassment and other Code of Conduct violations reduce the value of Dublin 2019 for everyone – we want you to be happy at our convention, so please do speak to us if needed.

### **What Will Happen if You Make a Report?**

When taking an in-person report, our Listener Team will first ensure that you are safe and cannot be overheard. They may involve other event staff to ensure your report is managed properly. Once you are safe, we'll ask you to tell us about what happened, and what you would like to happen next. We understand this can be upsetting, but we'll handle it as respectfully as possible and try to support you. You can also bring another person to support you if you wish.

If you submit a report by email, our Listener Team will respond to you as quickly as possible, and proceed at their discretion, based on the content, context and wishes expressed in your email.

However, you choose to report an issue, you won't be asked to confront anyone, and we will do our best to protect your identity if we take action as a result of your report. Details of your complaint will only be disclosed to the team or Committee members who are dealing with it. We will keep you advised of the progress we're making in handling the issue, and of any action we decide to take. We will take into account your views when deciding on that action. However, please be aware that, if you report a serious criminal matter, or we believe that you or someone else may be in danger, we may need to contact the police. We would take into account any concerns you may have around involving them.

The Dublin 2019 Team has the right to take any actions needed to keep our event a welcoming environment for all Attendees. Measures taken may include warning the offender, mediating solutions between parties, or taking any other action the team considers necessary, up to and including expulsion from the convention with no refund, at our discretion.

If you wish to take further steps following your report and our response, our team will be happy to help you contact hotel/venue security, local law enforcement, local support services, or otherwise assist you to feel safe for the run-up to and duration of the event. Above all, we want you to feel valued, safe and included at our convention!

*(Credit where it's due: this Code of Conduct is loosely based on Geek Feminism's example anti-harassment policy, created by volunteers.)*

## **Still Photography, Video, and Audio Recordings in Programme and Event Spaces**

Still photography, as well as video, and audio recording for personal, non-commercial use is allowed in all programme and event spaces, with the following exceptions:

- signage designating an event or programme session as not to be recorded or photographed. This will be posted at the entrance and will be monitored
- the moderator or MC indicates the programme item is not to be recorded or photographed
- no flash photography is permitted at any time.
- The WSFS Business Meeting will be recorded per the provisions of the WSFS Standing Rules.

## Our Venues

---

Dublin 2019 – An Irish Worldcon is operating in three locations: The Convention Centre Dublin (CCD), The Spencer Hotel Dublin City, and Point Square Dublin.

### **The Convention Centre Dublin (CCD)**

The CCD is where the bulk of activities occur, including Opening Ceremony (which includes the Retro Hugo Awards, Big Heart Award, and First Fandom awards presentations), the Hugo Awards Ceremony, the Masquerade, and Closing Ceremonies.

The main space on the CCD ground level, the Forum, will host the Dealers Area, Creators Alley, Fan Tables, Guest of Honour displays (among others!), and 2021 Worldcon Site Selection. The Academic Poster competition will be held in the CCD Level 4 Foyer.

If you like parties, this is your place to be! Parties begin mid-evening each night on CCD Level 4 in the Wicklow meeting rooms. All night-time activities will be held here.

Any activities – not listed elsewhere occur at the CCD.

### **The Spencer Hotel Dublin City**

The Spencer will host Childcare and the Children's Programme.

### **Point Square Dublin**

Point Square consists of the adjoining buildings of the Point Square Shopping Centre and the Gibson Hotel. It serves as a creative hub highlighting science and the visual arts. The convention is using the Odeon Point Square Cinema and other spaces, which we are calling the Warehouse 1 and Warehouse 2. (You'll understand the first time you visit.)

The Odeon Cinema screening rooms will host the majority of programme items dealing with science and technology, art, costuming, and comics and graphic novels. The Academic Track will also be run in Odeon 6.

Warehouse 1 will house the Art Show and Print Shop, the Maeve Clancy Installation, Lego showpieces from Brick.ie (among other displays), and collaborative art projects for members to participate in, including letterpress printing with the National Print Museum. Crafting sessions where you can hone your craft skills are here as well.

Warehouse 2 will be home to performances, book launches, and the Art Show Reception on Friday evening.

Some autographing sessions will be on the Odeon Point Square Mezzanine on the same level as the Warehouse spaces.

### **The Gibson Hotel at Point Square Dublin**

The WSFS Business Meeting and other functions, plus some regular programming on a wide variety of topics, will be held in some rooms at the Gibson Hotel.

### **Travelling Between the CCD and Point Square**

It is a 15-minute walk between the CCD and Point Square. However, the majority of our attendees will likely use the Luas Light Rail Transit System ([luas.ie](http://luas.ie)) Red Line Spencer Dock and The Point stops. Ticket vending machines are located at every stop. They accept coins, notes and debit/credit cards, and also give change. Please note that you cannot purchase tickets onboard the trams. You must have a valid ticket at all times on the tram.

If you use public transportation every day, you might want to purchase a seven-day Leap Visitors Card (€40). For detailed Leap Card information, visit [leapcard.ie](http://leapcard.ie).

## Convention Centre Dublin (CCD)

Note to US visitors: In Ireland, a building ground floor is G and counting begins on the first floor above that. So, for example, Level 1 of the CCD would be the second floor in the US.

### Access Desk

If you need access assistance, want to pick up your reserved mobility device, have any comments, suggestions, requests, or if you would like to get involved, come to the Access Desk.

### Accessible Toilets

Accessible toilets are located throughout the CCD on every floor. They have an alarm pull cord system, and are unisex.

### Auditorium Events Box Office

The CCD has asked us to implement a system to deal with crowds at our major events in the CCD Auditorium. An Events Box Office is located in the CCD Ground Floor Foyer from 13:00 – 16:00 on Thursday to Sunday. At the Box Office, you will be given a free colour-coded wristband that indicates which entrance to use to enter the Auditorium and at what time. You do not need a wristband for events in other performance spaces.

Thursday	Opening Ceremony featuring the 1944 Retrospective Hugo Awards Ceremony
Friday	Dublin's Worldcon Orchestra
Saturday	Masquerade

# Introduction to Dublin 2019 – An Irish Worldcon

---

Visit the lounge for details each night!

Adjoining the Teen Lounge will be an adjoining social area set aside for adults. Because members under 15 must be accompanied by an adult, they are especially welcome in this lounge.

A non-alcoholic bar will be open near the Teen Lounge. Alcohol is not to be consumed on this level from 20:00 onwards.

## Volunteer Desk

Everyone who works on Dublin 2019 is a volunteer, no matter what their role. It is a 100% volunteer effort run by fans for fans. Like all Worldcons, Dublin 2019 is a huge and complicated event, and we need literally hundreds of volunteers to help make it happen. If you can help us make Dublin 2019 a truly great Worldcon, please volunteer at the Volunteer Desk. You can choose from a variety of tasks and areas, and qualify for volunteer thank-you goodies!

Volunteer benefits include groats (named after the Irish silver coin worth four pence, not the cereal grain — our groats can be redeemed for food and beverages at CCD food booths), prize raffles, a special t-shirt, and priority seating rewards. If you would like to help us make Dublin 2019 a truly great Worldcon, please volunteer.

## Help Wanted

- Like twiddling knobs and pushing buttons?
- Know your gaffer from your electrical tape?
- Want a spot at the back of the room where you can control how people sound?
- Why not join Tech?

The Tech Crew are looking for volunteers for everything from running vision to running around with mics during question times. Interested?

### Fan Funds Auction

Are you a generous and discerning convention attendee who'd like to support fannish travel funds such as TAFF (the Trans-Atlantic Fan Fund) and GUFF (the Going Under/Get Up-and-over Fan Fund) as they strengthen connections across SF fandom by exchanging delegates between continents? Come to the Fan Funds Auction and exchange your cash for quality merchandise and unique items on Saturday at 16:00 in CCD Wicklow Hall 2B!

### Combat Demonstrations

Dublin 2019 is pleased to present two combat demos — fighters who enjoy noisy sword play in armour — but always with safety in mind. The groups performing these demonstrations are the SCA (Society for Creative Anachronism) and MACI (Medieval Armoured Combat Ireland — [armouredcombat.ie](http://armouredcombat.ie)). These demonstrations will be Saturday morning and late Sunday afternoon in the CCD Level 4 Central Foyer; check listings for exact times and details.

### Stroll with the Stars

Stroll with the Stars is a gentle walk each morning from Thursday–Monday beginning at 9:00 and returning before 10:00. A number of authors, artists, and editors will be participating during each walk (see the daily programme schedule for details). Meet in the Ground Floor Foyer of the CCD. No sign-up is required — just arrive by 9:00.

## Exhibits Halls

---

The Exhibits Halls are in The Forum on the Convention Centre Dublin (CCD) Ground Level and the Point Square Warehouse. Additional exhibits and displays are located in the CCD Level 3 and Level 4 Foyers.

### Art Show

The Art Show, located in the Point Square Warehouse along with a variety of collaborative art projects, is a traditional element of Worldcon and an important part of Dublin 2019. Works by the convention's Featured Artists will appear in the Art Show, in addition to a gallery of original drawings, paintings, sculptures, and jewellery from international and Irish artists. Many of the works in the gallery will be for sale by silent auction and through 'buy it now' instant sales. Alongside the gallery will be a Print Shop offering print reproductions, cards, and other smaller items for sale. Artists will also be participating in art-related events and programming across the convention.

### Dealers Area/Creators Alley

Artificers of crafts, costumes, games, jewellery, and other handmade goods are selling, demonstrating, and displaying their work in a changing array throughout the weekend in the Creators Alley located in the CCD Ground Level Forum.

Also in the CCD Ground Level Forum, the Dealers Area is filled with all kinds of merchandise ranging from books both new and used, comics, handcrafted jewellery, clothing and accessories, crafts, toys, collectables, and games. The Dealers Area and Creators Alley together are your trove of irresistible treats, souvenirs, and gifts. Once you see what's there, you'll keep dropping in for more!

### Displays

Split between the two Exhibit Halls, Displays include exhibits and presentations celebrating the work of our Guests of Honour, the Hugo Awards, and fannish works from across the world. In addition, there are distinctively Irish elements drawn from the rich background of Irish myth, literature and art, with science and science fiction from, in, and about Ireland past and present. We hope to inform and entertain you, show you things you've never seen, and, just occasionally, make you go "Wow!".

Presentations of academic posters from across the full range of academic disciplines will be in the CCD: Level 4 Foyer. Students and post-doctoral researchers have entered their submissions into a competition in two tracks, one for STEM subjects and one for the Arts, Social Sciences and Humanities. Both tracks have a €100 prize for the poster that best communicates its subject to the general public.

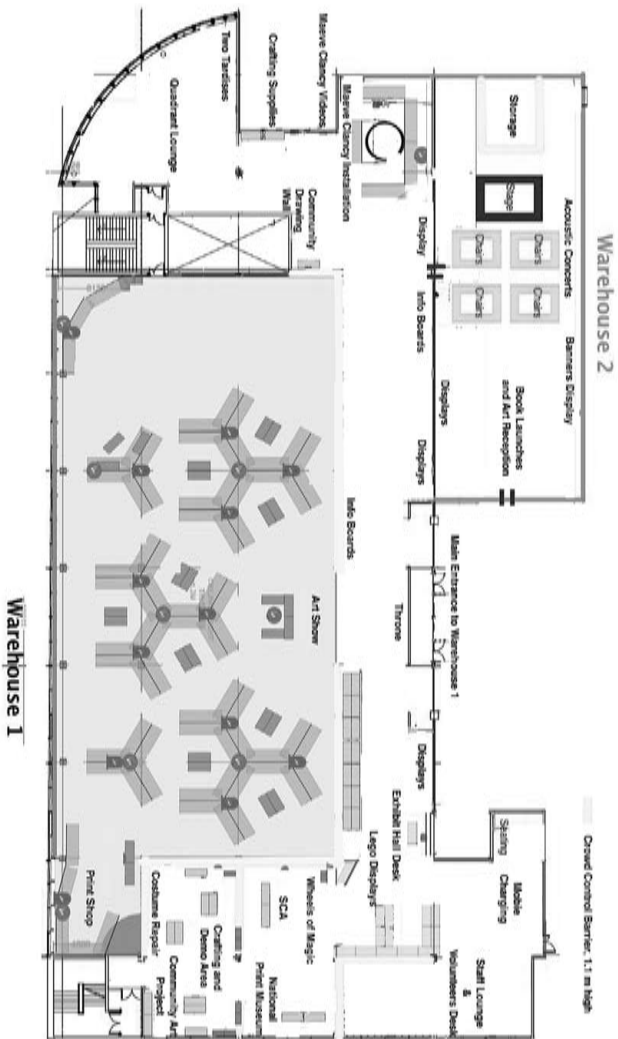

### Fan Tables

Our last (but not least!) element in the CCD Forum are fan tables where you can find out more about future conventions and bids, and about other fan-related activities and organisations that might interest you. You can ask questions of the organisers, sign up as a member or supporter, and pick up ribbons or stickers to wear on your convention badge.

### Site Selection

The site for the 79th World Science Fiction Convention (Worldcon) in 2021 will be determined by a vote of the members of this year's Worldcon. Your €40 Advance Supporting Membership (Voting) Fee automatically converts to a Supporting Membership for the winning 2021 Worldcon bid. Voting will close at 18:00 on Saturday. The winner of the 2021 Worldcon Site Selection will be announced at Sunday's WSFS Business Meeting.

## Fringe Events

The Fringe Division is primarily managing off-site activities in collaboration with cultural venues in Dublin to create complementary events during Dublin 2019.

### Parkrun Dublin!

What is parkrun? The short answer is it's a 5k run in the park! The longer answer is that it's a free, timed run — not a race! — and, in fact, you don't even have to run! — that takes place every Saturday morning, in over 20 countries around the world. We will meet at 8:30 outside the CCD, which gives us time to take a taxi, public transport — or, walk or run! — to Fairview Park, well in time for the run briefing and the start of the run at 9:30.

Fairview Park's parkrun is a three-lap course on grass and tarmac that brings runners within shouting distance of Bram Stoker's former residence in Marino Crescent. After the parkrun, some of us may grab a coffee with other parkrunners in a local café; otherwise, feel free to return to the convention (about a 30 minute walk or 10 minutes by bus).

### Irish Film Institute (IFI) Screening of *Forbribben Planet*

George R. R. Martin will visit the IFI for a very special screening of Fred M. Wilcox's seminal 1956 sci-fi classic *Forbidden Planet*. After the screening Maura McHugh will be in conversation with George R. R. Martin about his love for the film and its impact on him and his writing. Unsurprisingly, tickets for this event sold out in under an hour.

### Oppy or Armstrong?

Dublin 2019 in association with Science Gallery Dublin, is hosting a special pre-convention discussion about the future of space exploration with a panel of expert guests at 19:00 on Wednesday at the Paccar Theatre in Science Gallery Dublin.

Dr Noelle Ameijenda (astrophysicist, currently modelling the electrical power system), Aliette de Bodard (award-winning author of *The Tea Master and the Detective*), Dr Inge Heyer (Senior Lecturer in Physics & author of *Investigating Astronomy*), Geoffrey A. Landis (scientist & author of *Mars Crossing*), and Dr Jeanette Epps (scientist & NASA astronaut) will debate the topic of 'Oppy or Armstrong? Autonomous vs human space exploration'. Tickets to this event have sold out. We will livestream this discussion and post a recording to the Dublin 2019 YouTube channel.

### Treasure Hunt

If you should find yourself at loose ends, join in our treasure hunt. You'll need to visit many interesting corners of the convention, and will win a small prize if you finish! Here's the first clue:

## Programme Information

---

Read on for information about our exciting programme and for logistical information for programme participants.

### About Our Programme

#### For Programme Attendees

Our programme includes many different types of presentations, from items from single-participant presentations to multi-people panel discussions to interactive chats with participants and among attendees with similar interests! The daily programme starts at 10:00 in the CCD and 10:30 at Point Square.

#### Fan Chats

Fan chats (sometimes known as Birds of a Feather, Special Interest Groups, or Meetups) are small discussion groups of interest to a number of people. These might be organized guided discussions or free-form chats. Tables and chairs will be set aside for each discussion.

#### Academic Programme

The Academic Track, running in the Point Square Odeon 6 room each day, has a strong and distinctive thread of papers on Irish topics. While most papers look at literary approaches, there are also papers and more interactive workshops on science and ethics topics from Irish and international scholars. We are delighted to be able to include papers on topics outside the "Anglosphere" as well as presentations offering perspectives on themes like decolonization, gender, and ethics.

#### Kaffeeklatsches and Literary Beers

You can be part of a small, informal discussion group with a "host" - an author, artist, astronaut, musician and other interesting person - by signing up for one of our Kaffeeklatsches or Literary Beers being held in the CCD Level 3 Central Foyer and Martin Hoare's Bar known as Martin's (CCD: Level 1 Liffey A).

Sign up for Kaffeeklatsches and Literary Beers at the Information Desk in the CCD Ground Floor Foyer. Signup sheets will be available at least a day in advance beginning at the following times:

10:00 on Wednesday, Thursday, Friday, Saturday and Sunday for the next day's sessions that start between 10:00 and 13:00.

14:00 on Wednesday, Thursday, Friday, Saturday and Sunday for the next day's sessions that start between 14:00 and 21:00

Individual sessions are strictly limited, and because some hosts are very popular, you must sign up in advance. Each person in line may sign up for only one Kaffeeklatsch or Literary Beer for any given hour. We will have three (3) reserve places for each item in case someone does not show up or cancels.

Check in at the Kaffeeklatsches and Literary Beers Desk in the CCD Level 3 Foyer before the item so we know you are present. Attendees who have not arrived by the start of the session (even if they are only one minute late) will have their spot assigned to a reserve. In order to be fair to those on the reserve lists, private substitutions are not allowed. The person on the list must be the person who attends, and you cannot trade spaces. You may join a session as it starts if there are free slots available and no reserve people are waiting.

Kaffeeklatsches will have tea and coffee readily available for purchase. Literary Beers will take place in the late afternoon and evening. There is a bar in the foyer where you can buy a beer or other drinks during the session.

These sessions are 50 minutes long. Please help the next session start on time by not delaying the hosts at the end of your session. Kaffeeklatsch and Literary Beer sessions are listed in the Convention Book and in the Grenadine mobile app. Any changes will be announced in the newsletter and updated in the mobile app.

## Children's Programme

Our Children's Programme is jam packed full of fun and stimulating events for children aged 6 to 12. Some items are suitable for children aged 3+ while other items are for older kids and teenagers, who are also welcome to attend Children's Programme in the Spencer Hotel Columba Suites 1 and 2. Children under 6 years of age must be accompanied by an adult at all times.

Parents/guardians will be able to drop and collect children aged 6 and over from children's programme. They will have to sign the children in and out and provide a number at which they can be contacted at all times. Parents/guardians and children must sign and agree to our contract of cooperation, detailing behaviour requirements of everyone during Children's Programme and collection times for parents/guardians. These collection times must be strictly adhered to. Failure to abide by the contract of cooperation might lead to the children being excluded from the Children's Programme area.

Teens over 13 years will be permitted to attend children's programme events; however, they must sign and abide by our contract of co-operation and be aware that priority for materials and spaces will be given to attendees aged 6-12 years. Children under 6 years of age are welcome in Children's Programme but must be accompanied by an adult and might not be interested in or able to participate in some of the events. There will be a seating area for parents/guardians and children/toddlers who merely want to get away from the hustle and bustle of the main convention site.

Children's Programme runs from 13:00 – 16:30 on Thursday and 9:30 – 16:30 Friday – Monday with a break for lunch from 12:30 – 14:00. Family events designed for families to enjoy together will run Thursday – Sunday from 17:00 – 18:30. For these events, so children must be accompanied by an adult, with a ratio of one adult to a maximum of three children. Adults will not be permitted to attend family events without children.

Children's Programme is located in the lower ground floor of the Spencer Hotel, a five-minute walk from the CCD. For the children's safety, this area is secure and not open to other guests at the hotel. Children will be accompanied by garda (police) vetted staff and volunteers at all times. Children must have registered and received their Worldcon badges at convention Registration before they can be signed into Children's Programme.

While some programme items have an element of competition, children can attend any event just for fun without having to compete. Similarly, all children taking part in the Mini Masquerade will receive a medal and certificate. Our environmentally friendly policies mean that a lot of the materials used during building and crafting events will be made from recycled paper, cardboard, and plastics.

## Autographing

Autographing will be located in the CCD Level 4 Central Foyer and Point Square Mezzanine Level. Signings for more well-known personalities will be in Point Square. Artists, comic book creators, and graphic novelists will also sign at Point Square.

Guidelines to help autographing at Dublin 2019 run smoothly:

- You are limited to asking an author to sign no more than three books per pass through the line. In certain cases, the Autographing staff might have to lower the number of books per pass. In particular, George RR Martin will sign only one item.
- Once you have had three items signed, you will be able to go to the end of the line for a second turn if the author has the time to handle repeat requests from the same person.
- Authors have a maximum of 50 minutes for their signings and must leave promptly at the end of their session to make way for the next set of authors.
- Post-It notes will be supplied to spell out your name and for any desired dedication to avoid misspellings, and misheard dedications.

## Programme Information

---

Please be courteous if there is a queue — give other fans a chance to get their items autographed.

In order to avoid having people wait in line when the line reaches too many people for the author to sign for everyone in time, the staff might need to close the line before the session is over.

See the hours listings for the opening times of autographing in both the CCD and the Point Village. Specific autographing sessions are listed in the main schedule section of this publication, and also on the Grenadine mobile app.

### For Programme Participants

#### Programme Participant Check-in Desk

Programme participants should pick up their programme packets here. Please pick up your membership badge at Registration first.

#### Programme Participant Green Rooms

For your convenience, we are operating two Green Rooms for programme participants: one in the CCD Level 5 Foyer and the other on the Point Square Odeon Cinema level.

We encourage you to come meet your fellow panelists and pick up your beverage of choice before your scheduled event. Hours are listed in the opening hours section.

#### Programme Operations Office

Programme participants with requests to make or issues to resolve can go to Programme Operations in the CCD Level 1 Liffey Room 4. This is also the place to report problems that might occur during an item. (Bad sound? Inoperative projector? Missing panelist?) Hours are listed in the opening hours section.

### TAKE HOME A PIECE OF FAN HISTORY LIMITED STOCK AVAILABLE

Northern Irish fan Walt Willis was a great influence on fandom, particularly from the 1950s onward, bringing his own brand of humorous writing to Ireland, the UK, and the US. His influence went beyond writing, though: it is because of efforts to bring him to the 1952 Worldcon in Chicago that we have traditions like the Trans-Atlantic Fan Fund, Going Up and Over Fan Fund, and Down Under Fan Fund (and other fan funds). He even co-wrote the basis of one of our theatrical performances alongside Bob Shaw, *A Pilgrim's Progress The Enchanted Duplicator!*

Of course, he was best known for his fan writing. He won a Hugo for it in 1958 (as Best Actifan), and was nominated several more times. He was responsible for the fanzines *Slant* (with James White) and *Hyphen* (with Chuck Harris), and contributed to many more, including his series "The Harp that Once or Twice" for *Quandry*.

#### THE WRITER, THE WIT, THE WARHOON

His work was celebrated by his peers and other fans, from special editions of fanzines and collections of his writings through being a Worldcon honoree in 1992 as *MagiCon's* Fan Guest of Honour. However, Richard Bergeron pulled out all the stops in 1978. The Willis-dedicated issue of his fanzine *Warhoon* (*Warhoon* 28) is a work of art in its own right. Hardbound and gold-embossed, it's a massive anthology of Willis's writings and art, reflecting the history of the man and his fan writing.

This is your chance to take home a real piece of fan memorabilia. We have the remaining stock of *Warhoon* 28 available here at Dublin, and are delighted that we can share our joy at what an influence a Northern Irish writer had on the science fiction world. Come buy your copy today!

### Gaming Hall

Gaming will take place in the CCD Level 2 Wicklow Hall 2, opening at 10:00 each day. The Gaming Hall caters for both diehard tabletop gamers and those of you who would like to try something new. No experience is necessary: all you need is an open mind and a willingness to have fun!

#### Board Games

The Gaming Hall features a large selection of board games for attendees to borrow, and our volunteers are happy to help teach those games. If you have never played modern board games before, ask one of the gaming staff members in the hall who will teach you a game and get you playing as quickly as possible. Existing tabletop gamers are encouraged to bring along their own games to the convention and to find players to join them!

Each day, the Gaming Guest of Honour, Steve Jackson (of Steve Jackson Games, creator of GURPS, Munchkin and so much more!) will be visiting the Gaming Hall to play games with the attendees. If you'd like a chance to play with Steve Jackson, come to the Gaming Hall for one or more of the "Gaming with Steve Jackson" sessions (one each day) listed in this publication and also on the Grenadine mobile app.

#### Gaming Workshops and Talks

In addition to a multitude of gaming-related panels, the Gaming Programme will feature the following introductory workshops and talks:

- Introduction to Dungeons & Dragons (Thursday 13:00 and Saturday 11:00 in CCD Level 2 Wicklow Meeting Room 3)
- How to Introduce Kids to Roleplaying (Saturday 14:00 in CCD Level 2 Wicklow Meeting Room 3)
- Making the transition from Player to Gamesmaster (Friday 10:00 in CCD Level 2 Wicklow Meeting Room 1)

Consult this guide and the Grenadine mobile app for more details.

#### Role Playing Games

The Gaming Hall will offer a range of tabletop role-playing experiences from Dungeons & Dragons 5th Edition to Call of Cthulhu, Vampire, Cyberpunk, the Laundry Files, and many more that you might not have heard of but all of which are sure to entertain.

If you've made a character for Dungeons & Dragons at the workshop, you'll be able to play in games with them over the convention. Don't worry if you don't have a character ready or dice to hand, all our games will have pre-generated characters and everything else needed so you can just turn up and play!

Gaming slots are available at the following times in the Gaming Hall:

- Thursday: 14:00 – 17:00 and 19:00 – 22:00
- Friday, Saturday and Sunday: 11:00 – 14:00, 15:00 – 18:00, and 20:00 – 23:00
- Monday: 11:00 – 14:00

Each slot will have a choice of games from our volunteer Game Masters, with places available on a first-come, first-served basis.

#### Gaming Hall and Children

Children under 15 years old must be accompanied by a parent/guardian at all times. While a child is playing a game, their parent/guardian must remain in the Gaming Hall. Additionally, some RPGs might have an age limit, which will be strictly enforced.

## Wednesday – Thursday Programme Schedule

### Wednesday

- 19:00 **Oppy or Armstrong? Autonomous vs human space exploration**  
1033 Panel 120 minutes Other: Fringe  
The Mars Explorer Rover, nicknamed Opportunity ('Oppy'), launched in 2003, cost US\$400 million and operated for 15 years. While an impressive achievement, what more could have been done with a sustained human space programme that was focused on Mars? Can the flexibility of an onsite human team justify the undoubtedly higher cost? What is the role of humans and robot probes in the exploration of space?
- Our panellists examine the various (dis)advantages of both human and robotic exploration of Luna and Mars. This is a free, ticketed event that must be booked in advance; it is taking place at the Science Gallery Dublin, Pearse Street, Dublin 2.
- Noelle Ameijenda PhD (M), Jeanette Epps, Aliette de Bodard, Dr Inge Heyer, Geoffrey A. Landis*

### Thursday

- 10:00 **Live long and prosper: yoga and meditation for Trekkies (Day 1)**  
2021 Workshop 50 minutes CCD: Wicklow Room-5  
If you really want to live long and prosper, try yoga. A certified Kundalini Yoga instructor will guide the group through simple movements to warm up the spine and get your creativity flowing, followed by a meditation that incorporates Mr Spock's favourite mudra: the Vulcan salute. This introductory-level class can be done in a chair, or feel free to bring a mat and pillow. Comfortable clothes recommended: red shirts not advised. Sign-ups in advance will be required for this workshop. Engage!
- Erin Wilcox*
- 10:00 **Retro Hugos discussion**  
2015 Panel 50 minutes CCD: Wicklow Hall-1  
The Retro Hugo Awards honour works published after 1939 during a year for which no Hugos were awarded. This year the finalists have been drawn from works published in 1943 which would have been eligible for the 1944 Hugo awards, had they been held. The panel will discuss the finalists and where they fall in the overall history of SFF.
- Heidi Lyshol (M), Robert Silverberg, Jukka Särkijärvi*
- 10:00 **Fanzines now!**  
2012 Panel 50 minutes CCD: Wicklow Hall 2B  
Fanzines have been a beloved part of fandom for decades, and new ones are still springing up. What are the best new fanzines, and what classic fanzines are still putting out new content? Our panel of creators and enthusiasts discuss the relevance and importance of contemporary fanzines.
- Phoebe Wagner (M), Greg Hullender, John Coxon, Philippa Ryder, Joe Siclari*
- 10:30 **'The Raksura Colony Tree': a community art project 1**  
2036 Workshop 50 minutes Point Square: Warehouse Art Demo Area  
'The Raksura Colony Tree' is a community art project for Dublin 2019, celebrating the worldbuilding in Martha Wells's Books of the Raksura series by creating part of a colony tree in fibre and thread. A lot of fibre arts lend themselves well to creating organic forms: trees, bushes, lianas, grass, and lots more. Come by to find out more about the project, and help us to make an awesome model! All kinds of fibre crafts are welcome; whether you knit, crochet, embroider, tat... we've got lots of materials and pattern ideas. Take a peek at what we've already got at [raksuracolonytree.home.blog](http://raksuracolonytree.home.blog)

## Thursday Programme Schedule

---

- 10:30 **Billy O'Shea book launch: Kingdom of Clockwork (Chinese translation)**  
2033 Book launch 60 minutes Point Square: Warehouse 2  
- Performance space  
The Irish/Danish steampunk trilogy Kingdom of Clockwork by Billy O'Shea has enjoyed success as a paperback, audiobook, and ebook. The Chinese translation of the first book in the series will be presented on Thursday 15 August (10:30-11:30), in Warehouse 2 (WH2) on the 1st floor at Point Square. We will be serving light refreshments. A book trailer may be seen on YouTube.
- 11:00 **Invasion and the Irish imagination**  
2042 Panel 50 minutes CCD: Wicklow Hall 2B  
The history and culture of Ireland have been shaped by invasion, from the mythologisation of *Lebor Gabála Érenn* ('The Book of Invasions'), set down in the 11th century, to the arrival of the Normans and English in subsequent centuries. How has Irish fantastic literature engaged with this history? How is it similar to, or different from, other post-colonial fantastic literatures? And how do contemporary Irish SF writers tackle invasion and its aftermath in their work?  
*Ruth Frances Long (M), Jo Zebedee, Ian McDonald, Dr Jack Fennell, Peadar Ó Guilín*
- 11:00 **Crime and punishment in the age of superheroes**  
2039 Panel 50 minutes CCD: Liffey Hall-2  
Superhero TV shows repeatedly borrow the structures and tropes of cop shows, with many superheroes being 'Cowboy Cops' – operating according to the Rule of Cool with a sketchy adherence to notions of due process and civil rights. Can these hybrid narratives really acknowledge the ways in which real law enforcement is tangled up with race, class, and so on, and what do they reveal about attitudes to contemporary policing?  
*Chris M. Barkley (M), Rachel Coleman, Dan Moren, Aliette de Bodard*
- 11:00 **Taking accurate body measurements**  
2060 Workshop 80 minutes CCD: Wicklow Room-5  
Accurate, up-to-date measurements are the cornerstone of well-fitting clothing. Learn how to properly take measurements, get your own, and find out which ones are vital and which are a good idea. We will be taking each other's measurements. Wear comfortable, but not baggy clothing. Some tape measures will be provided, but you are encouraged to bring your own. Participation is NOT required.  
*Jennifer Skwarski (M), Karen McWilliams*
- 11:00 **LitRPG, GameLit and isekai**  
2057 Panel 50 minutes CCD: Wicklow Room-4  
What is LitRPG? How does it differ from GameLit and isekai? Join our panel of authors and fans for an in-depth discussion of literature that uses the language and structure of video games.  
*Likhain (M), Conor Kostick, Joseph Malik*
- 11:00 **Romancing the undead**  
2066 Panel 50 minutes CCD: Liffey Room-2  
Vampires have long been the undead creatures of choice for paranormal romance, but how about other things that go 'bump' in the night? What has led to the popularity of vampires over other undead creatures?  
*Chelsea Mueller (M), Annie Bellet, Maquel A. Jacob, PRK*
- 11:00 **Ruins, curses, and family secrets: the Gothic**  
2054 Panel 50 minutes CCD: Wicklow Room-3  
Where does the Gothic fit into the overall horror tradition? What elements of the Gothic remain so compelling today, and why? Panellists discuss the genre from its roots to Southern Gothic and other modern interpretations.  
*Dr Tracy Fahey (M), Eden Royce, F. Brett Cox, Dr Theodora Goss*

## Thursday Programme Schedule

---

- 11:00 **Writing from non-western cultures**  
2045 Panel 50 minutes CCD: Wicklow Hall-1  
The number of non-western novels and stories in SFF has increased over the last 20 years, as has visibility of existing fiction. Our panel looks at some of these novels, discussing favourites and sharing recommendations. We'll take a look at how the novels are written, as well as the differences in story patterns, characters, and narrative styles. Let's celebrate these novels and look at ways to further expand the publishing of non-western cultures within SFF literature.  
*Yasser Bahjatt (M), Tasha Suri, Rafeeat Aliyu, Vida Cruz*
- 11:00 **Convention tour – Thursday**  
2072 Docent 50 minutes Other: Miscellaneous - Onsite  
Welcome to Dublin 2019, an Irish Worldcon! Our convention tour leaders are here to help introduce you to the convention, show you where everything is, and make some suggestions of things you shouldn't miss. Highly recommended for anyone who hasn't attended a Worldcon before. The tour will start by the Registration area.  
*Leane Verhulst*
- 11:00 **Fan funds around the world**  
2048 Panel 50 minutes CCD: Wicklow Room-1  
Fan funds such as TAFF and GUFF help fans to travel across the globe to experience conventions they might not otherwise get to. How do fan funds work, what happens when you win one, and how do you remember everything that happened on your trip so that you can report back? Past delegates talk about their experiences and why you should support the funds.  
*Anna Raftery (M), Marcin "Alqua" Klak, Regina Kanyu Wang, Alan Stewart, Simon Litten*
- 11:00 **Is it about a bicycle? The influences of a comedic genius**  
2051 Panel 50 minutes CCD: Wicklow Room-2  
Flann O'Brien's *The Third Policeman* is a significant and well-loved novel, especially in Ireland. (One of its central characters, de Selby, has become a cult hero. Cited as Alan Moore's favourite book, its prodigious footnoting was a major influence on Robert Rankin.) Yet it was initially rejected by publishers and finally issued only after the author's death. See what our panel make of this!  
*Nigel Quinlan (M), Jenna Maguire, Pádraig Ó Méalóid, Nicholas Whyte, Mr Frank McNally*
- 11:00 **High Stakes**  
2063 Play 60 minutes CCD: Wicklow Hall 2A  
Pete (the Cardinal) Cox – previously poet-in-residence of The Dracula Society – is bringing his 'spooked word' show *High Stakes* to Worldcon! In this one-man show he explores the fears we all have – be they mortgages or vampires – delving into the darkest depths of human existence, and then awarding prizes for the best shoes in the audience (with some reminiscences, aided by puppets, along the way).  
*Mr Peter Cox (M)*
- 11:30 **The popularity of anti-heroes in comics**  
2084 Panel 50 minutes Point Square: Odeon 3  
Deadpool, Harley Quinn, the Punisher, Ghost Rider: in many ways they are evil individuals – hardly what we would call heroes! And yet they are some of the most popular and interesting comics characters around. Are they better-written characters (and if so, why)? Do readers, and creators, need a counterpoint to all the feats of noble heroism to which action heroes are typically inspired?  
*RJ Barker (M), Michael Carroll, CE Murphy, Helena Nash*

## Thursday Programme Schedule

---

- 11:30 **So long, and thanks for all the fish**  
2087 Panel 50 minutes Point Square: Odeon 2  
Like the dolphins of *Hitchhiker's Guide*, nonhuman life can communicate with humans in numerous ways including non-verbal interactions, signalling, and even parasitism. Panellists from diverse fields of research discuss the oddness of life and the strange ways the natural world talks to us.  
*Dr Claire McCague (M), Lionel Davoust, Linnea Sternefält, Becky Chambers*
- 11:30 **Introduction to working with leather**  
2081 Talk 50 minutes Point Square: Odeon 4

*Mr Ingvar Mattsson (M)*
- 11:30 **Maeve Clancy installation talk**  
2078 Docent 60 minutes Point Square: Maeve Clancy Installation  
Featured Artist Maeve Clancy usually works with story, drawing, and paper cut-outs. These are displayed in a variety of ways and often in a self-created contained space. Maeve likes to have her audience leave the world they inhabit every day and view the work in a place of her own creation. She will discuss both these past works and the new work created especially for Dublin 2019, an Irish Worldcon.  
*Maeve Clancy*
- 11:30 **Pulsars**  
2093 Presentation 50 minutes Point Square: Odeon 1  
In 1967 a radio signal from space was detected at Mullard Radio Astronomy Observatory. It was so regular that it was nicknamed LGM – 'Little Green Man'. What was the origin of this mysterious signal? How better to find out than from the person who made the discovery? Professor Jocelyn Bell Burnell will speak about pulsars and their massive importance to modern astrophysics.  
*Prof Jocelyn Bell Burnell*
- 11:30 **Worlds**  
2090 Academic 50 minutes Point Square: Odeon 6 (Academic)  
1. Dr Sara L. Uckelman – 'Names: Form & Function in Worldbuilding & Conlangs' 2. Andrew Richardson – 'Civilisation and Science Fiction' 3. Dr Kevin Koidl – 'Trust and the Future of Social Media'
- 12:00 **A musical history of Swedish fandom**

- 12:00 **Writing robot and nonhuman intelligence**  
2105 Panel 50 minutes CCD: Wicklow Hall-1  
Robots talk in a metallic voice, speak in a staccato rhythm, and walk in awkward movements. Right? That may have been true in the 1950s, but robots have evolved. So what does it mean today to be a robot? How have they changed over the years and how might they change still? How do we write one in a convincing way, and can we apply these same ideas to writing other nonhuman intelligences?  
*Martha Wells (M), Charles Stross, Christopher Husberg, Mika Koverola*

## Thursday Programme Schedule

---

- 12:00 **Holding out for a hero?**  
2129 Panel 50 minutes CCD: Liffey Room-2  
Every story needs a hero, a protagonist, someone for the audience to root for. Or do they? Do we really need heroes in science fiction and fantasy, or is it possible to write SFF without one? If an evil plot happens in a forest and there is no one there to save the day, will a publisher buy the novel rights? The panel will explore the concept of the hero in SFF.  
*F. D. Lee (M), Kim ten Tusscher, Mari Kotani, Hal Duncan, Nancy Kress*
- 12:00 **Introduction to steampunk**  
2102 Panel 50 minutes CCD: Wicklow Hall 2B  
Steampunk is a subgenre of SF influenced by the technology and aesthetics of 19th century steam-powered machinery. Stories are often set in an alternative history of the 19th century but can also be about future or fantasy worlds in which steam power plays a large role in society. There is a wide range of steampunk literature, art, and fashion, and this panel will serve as an introductory overview of steampunk as a whole.  
*Laura Anne Gilman (M), Dr Takayuki Tatsumi, Rie Sheridan Rose, J.S. Meresmaa*
- 12:00 **When scientists write science fiction**  
2108 Panel 50 minutes CCD: ECOCEM Room  
Write what you know. That bit of advice has been handed down to new writers with great regularity, but what does it mean for writers whose day jobs are in the science and technology fields? What advantages or challenges do they face when writing with a science background? What does it take to walk in both worlds?  
*Dr Douglas Van Belle (M), Kali Wallace, Alisa Hellstrom, Dr David L Clements*
- 12:00 **VR and AR: the future of gaming or a fad?**  
2111 Panel 50 minutes CCD: Wicklow Room-1  
In 2015 the gaming industry was abuzz with the potential of both virtual and augmented reality. However, the expected explosive growth of these technologies did not happen. This panel will discuss the potential of these exciting technologies and whether or not they will ever achieve the potential people believed they would have a few short years ago.  
*Tom Toner (M), Kevin Elliott, Rebecca Gomez Farrell, Prof Dave Lewis*
- 12:00 **Writing villains in YA literature who defy expectation**  
2114 Panel 50 minutes CCD: Wicklow Room-2  
In YA fiction, the bad guys used to be easy to spot in their metaphorical black hats and handlebar moustaches. What does the revamped 'villain' archetype mean for our young heroes? How does it affect the story and the other characters? How might this more nuanced sense of good and bad play out as young adult fiction continues to evolve?  
*Fonda Lee (M), Holly Black, Sandra Kasturi, Eoin Colfer, Michael Scott*
- 12:00 **Welcome to Worldcon**  
2117 Panel 50 minutes CCD: Wicklow Room-3

- 12:00 **Liking problematic things**  
2099 Panel 50 minutes CCD: Liffey Hall-2

Can you still enjoy problematic creations? How do you reconcile your enjoyment with your values? Our panellists have felt your pain and have some tips to share.  
*Sarah Gulde (M), Leo Adams, A. T. Greenblatt, Sam Hawke*

He occasionally performs with a geek band called Possible Side Effects.

Its 6.5 metre diameter mirror, orbiting the Sun-Earth L2 point 1.5 million kilometres from here, is designed to give astronomers superb capabilities for exploring the infrared universe. Canada, the European Space Agency, and NASA cooperated to create it. Bill Higgins reviews the Webb's design and the astronomical phenomena it will examine.

Donning the new name Rimuru Tempest, he set out into this new world. In a genre that is currently so oversaturated, how did the story of Rimuru manage to stand out?  
*Legendgerry (M)*

## Thursday Programme Schedule

---

*Kaja Foglio, Oisín McGann, Rob Carlos*
- 12:30 **Pasts and futures**  
2162 Academic 50 minutes Point Square: Odeon 6

- 13:00 **DC: TV vs film**  
2171 Panel 50 minutes CCD: Wicklow Hall 2B  
In contrast to Marvel’s attempts to create a unified cinematic universe, DC have embraced variety – at least to the extent of having two universes rather than one. On the silver screen, the Justice League are mostly portentous, highly stylised, demi-gods; on TV, the Arrowverse explores more YA-ish, human-scale stories. What are the strengths and weaknesses of each of DC’s approaches? What, if anything, could each learn from the other?  
*John Coxon (M), Dan Moren, Mari Ness, Ginjer Buchanan, Simon R Green*
- 13:00 **Non-English language SFF television**  
2183 Panel 50 minutes CCD: Wicklow Room-2

What does YA look like in other languages, and other cultures? Does YA have a different structure, definition, or age range in different regions? What are the challenges of translating stories, situations, and even slang between languages? What special challenges might different cultures present, and are YA readers seeking out those differences?  
*Magdalena Hai (M), Marianna “Kisu” Leikomaa, Gili Bar-Hillel, Taiyo Fujii*

- 13:00 **Understanding convention culture: the importance of data**  
2189 Presentation 50 minutes CCD: Wicklow Room-4  
The Worldcon has a rich history and tradition, but we remain ignorant about many aspects. Information that would help us understand the importance of programming is lacking and other data (e.g. ethnic background or gender) can foster discrimination as well as diversity and access. Open discussion of the importance of good data is needed to assure the relevance and growth of Worldcons.  
*Jennifer Zwahr-Castro*
- 13:00 **Evolution of fanzines**  
2180 Panel 50 minutes CCD: Wicklow Room-1  
Fanzines have a long history and are some of the original forms of fanac. How did they get started? Was there a golden age of fanzines? - 13:30 **Star Wars Episode IX: The Rise of Skywalker**  
2225 Panel 50 minutes Point Square: Odeon 1  
This latest instalment is rumoured to be the end of the Skywalker saga; what does the subtitle imply? Will Rey turn out to be a Skywalker, despite what Kylo said? Can Sith now be force ghosts, or will Palpatine make his appearance in some other (non-aural) form? Our crack panellists have fun speculating on what will take place, how much of Episode 8 will be retained and what will be retconned.  
*Nikki Ebright (M), Dr Liz Bourke (M), Jackie Kamlot, Gabriel Petersen*
- 13:30 **Horticulture in extreme environments**  
2216 Panel 50 minutes Point Square: Odeon 3  
How do we sustain horticulture in extreme places like alien planets or on Earth after a massively devastating event? How do we grow and cultivate food in areas that are hostile to us... or that need extra care and preparation to succeed? And, to put a literary spin on it, how do you write it convincingly if your story is set in such a place?  
*Theresa Storey (M), Ian McDonald, Dr Helen Pennington, Paolo Bacigalupi*
- 13:30 **Throwing Grandma Out The Airlock**  
2213 Talk 50 minutes Point Square: Odeon 5  
Old women fill support roles in fantasy, ranging from fairy godmothers to the wise old crone. Come along and get your game on!  
*Neil Williamson (M), Chris M. Barkley, Rick Wilber, Fonda Lee*
- 14:00 **Wild Cards: Wild West Trivia**  
2282 Event 80 minutes CCD: Liffey-B (Second Stage)

- 14:00 **Dragons and debutantes: fantasy set in the Regency**  
2261 Panel 50 minutes CCD: Wicklow Room-1  
The Regency period in the UK, the time of the Napoleonic wars in most of Europe, has long been a rich source of inspiration for fantasy novels – including Naomi Novik's Temeraire series and Susanna Clarke's *Jonathan Strange and Mr Norrell*. How has the Regency been used as an inspiration for fantasy writing? Why does this period in particular have such an abiding appeal?  
*Mary Robinette Kowal (M), Heather Rose Jones, Zen Cho, Susan de Guardiola*
- 14:00 **Fuzzy lines: decategorising creative work**  
2279 Panel 50 minutes CCD: Liffey Room-2  
Authors write blogs, fanzines go online, publishers create fanzine-like websites, fancasts publish fiction, YouTube videos offer original dramatic performances. Is a fan artist defined by economics or by context, and what exactly constitutes a series anyway? How do we define the categories into which our creative outputs fall, and must every project fit into a category?  
*Mur Lafferty (M), Ilana Galadriel BAT, Leticia Lara, Thomas Wagner*
- 14:00 **A portable kind of magic: why we love books-about-books**  
2273 Panel 50 minutes CCD: Liffey Room-1  
Whether it's a library of every book ever written, a compendium of magical creatures, or a hitchhiker's guide to the universe, we've always loved a good story-about-a-story. What is behind our fascination with books and libraries, and why does it translate so well to SFF? How does the history of book-making connect to our myths and legends, and what shape will our meta-stories take in the future?  
*Genevieve Cogman (M), A.J. Hackwith, Tasha Suri, Miriam Weinberg*

- 14:00 **Franchise characters**  
 2264 Panel 50 minutes CCD: Wicklow Room-2  
 Marvel characters are often mentioned in other MCU films, reminding us of their shared universe; DC TV shows have annual crossover events. How have these franchises – and others such as Star Trek – taken advantage of their epic canvasses to deepen characterisation? Are the in-universe reputations of some characters used to challenge our understanding of them rather than reinforce it?  
*D.A Lascelles (M), Scott Edelman, F. D. Lee, Roz Kaveney, Keith Byrne*

## Thursday Programme Schedule

---

- 14:00 **Concert: Lynn Gold**  
2270 Concert 50 minutes CCD: Wicklow Hall 2A  
Lynn Gold has been writing and performing filk and funny music for longer than she likes to publicly admit. She has also run music tracks for many cons, has been a Fan GOH at Loscon, Featured Filker at Leprecon, Interfilk Guest at Conterpoint, Toastmaster at Consonance, and is Chair of Consonance 2020. By day, she's a Senior Technical Writer at MarkLogic in San Carlos, California, USA. Lynn lives in Mountain View, CA, USA with her Bichon Frise, Grace (as in "Hopper").
- 14:30 **Comic creators' tools**  
2309 Panel 50 minutes Point Square: Odeon 2  
Does the artist choose the tool or the tool choose the artist? Many artists are making the shift to digital, partly due to the increased pace of deadlines but also in large part to the additional freedom that the 'undo' button allows. The downside is the lack of a physical 'original' to sell, and some artists just prefer the physical interaction between brush and canvas, pen and paper. How do we discover what works best for each artist, and is there a clear advantage to one over the other?  
*Oisin McGann (M), Sana Takeda, Lee Moyer, Charles Vess*
- 14:30 **Our changing views of humanity in space**  
2300 Panel 50 minutes Point Square: Odeon 5  
Ideas like colonisation are losing ground as humans develop more inclusive views of our future in space. Panellists will discuss changing views of space exploration and the expansion of our species to other worlds. Who gets to name planets? In what ways will we protect new worlds against contamination or resource exploitation? How can we ensure a vision of space that is relevant to everyone?  
*Dr. JA Grier (M), Dr Laura Woodney, Russ Colson, Dr V Anne Smith*
- 14:30 **Science, religion, and the art of storytelling**  
2303 Talk 50 minutes Point Square: Odeon 4  
What do astronomy, religion, and science fiction have in common? They are all interested in the big questions; and they also all depend on the art of storytelling to present their strange and wonderful ideas in ways that people can understand, appreciate, and evaluate. We'll examine why stories are fundamental to our understanding of religion; when being a good storyteller is essential in doing science; and how the way we tell these stories influences how we think about the big ideas.  
*Brother Guy Consolmagno*
- 14:30 **The Sapphic renaissance**  
2306 Panel 50 minutes Point Square: Odeon 3  
With *Killing Eve* making waves at the awards, shows like *Orphan Black* and *Killjoys* featuring prominent f/f love stories, and books like Aliette de Bodard's *The Vanisher's Palace* and Samantha Shannon's *The Priory of the Orange Tree* centering on wlw, are we in a golden age for the representation of queer women in SFF?  
*Kelly Robson (M), Tamsyn Muir, Lindsay Ellis, Freya Marske*
- 14:30 **AI and the myth of singularity**  
2315 Panel 50 minutes Point Square: Odeon 1  
In his 2017 keynote at the 34th CCC ('Dude, You Broke The Future') author Charles Stross argues that AIs have lived amongst us for centuries, and that to predict our post-Singularity future we must look to the old, slow ancestral AIs: corporations. To what extent is the 'artificial intelligence' of H.A.L. and GLaDOS the wrong thing to be afraid of? Where can modern science fiction turn when it envisions AI in today's world of machine-learning and neural networks?  
*Klaus A. Mogensen (M), Lettie Prell, Hadas Sloin, Martha Wells*

## Thursday Programme Schedule

- 14:30 **Utopias**  
2312 Academic 50 minutes Point Square: Odeon 6 (Academic)

Tom Moylan – 'Cognitive (Re)Mapping in *Notes from a Coma*'
- 14:30 **P/Faerie Tale – pop up #1**  
2294 Play 50 minutes Point Square: Warehouse 2  
- Performance space  
*P/Faerie* is a new movement play. 'F' is not in the Philippine alphabet; 'ae' is in the Gaelic alphabet. Putting a slash between two letters can make a word exclusive or inclusive. Putting a wall between any nations – say, the land of Faerie and the mortal realm – could arguably also be exclusive or inclusive. Depends which side you're on. This Saturday, 17 August, will be the first – albeit truncated – version of this play ever seen onstage (it has only existed in staged readings at Capricon and was originally created as a short for the Solstice Arts Centre in Co. Meath). Though we have the costumes, the puppets, the props, the people... we'd like the audience to help us decide which 'side' these elements fall on. Are they Diwata? Are they Sidhe? Are they mortal? We have some idea but we'd like you to participate in the final say.  
  
Therefore, please join us on **Thursday 15 August** for a 30-minute discussion of the Diwata, faeries of the Philippines. Help us to decide if what we're planning to put onstage on Saturday really represents what we tell you about the Diwata. After all, who wouldn't wanna talk about Diwata?  
  
On **Friday 16 August**, join us for a 30-minute discussion of the Sidhe, faeries of Ireland. The playwright admits that, even though she received her doctorate in Theatre History from TCD, she's not Irish; she really wouldn't want to claim authority on this, so please help her out here (just be gentle).  
  
And then, on **Saturday 17 August**, join us for the hour-long world premiere of *P/Faerie Tale*. A few weeks before the Worldcon, we will be releasing an audio recording of the first scene of the play, which we will not be performing in Dublin. It's a prequel, which should not be necessary to listen to before the show but which will enhance the events at the convention.  
About the play: Mara, an Irishwoman, heartily disapproves that her son married her former caregiver, Naomi, a Pilipina. But Naomi needs Mara's help, because the one-year-old child of the union has been abducted by faeries and Naomi cannot battle Irish faeries (Sidhe), having only ever encountered Philippine ones (Diwata). Are P/Family ties stronger than P/Faerie magic, or will the bitter P/Feud between the two women leave a child beyond the pale P/Forever?  
*Dr Ruth Palileo, Jonathan East, Zack Georgian, Ginger Leopoldo, Amy Flood, Oscar Hernández Rodríguez, Niamh Clancy*
- 14:30 **Reading: Sarah Rees Brennan**

- 15:00 **Current politics reflected in SFF**  
2348 Panel 50 minutes CCD: ECOCEM Room  
SFF is probably the genre that best mirrors present day society. If we examine SFF in both visual media and books, what can we learn about current politics playing out? What might future generations surmise about us?  
*Dr Harvey O'Brien (M), Susan Connolly, Dr Douglas Van Belle, Alec Nevala-Lee*

## Thursday Programme Schedule

- 15:00 **Found in translation: SFF translated works**  
2360 Panel 50 minutes CCD: Wicklow Room-4

- 15:00 **Cooking the books: food in fantasy**  
2351 Panel 50 minutes CCD: Wicklow Room-1  
Hobbits had their second breakfast and elves had their lembas. The panel will discuss their favourite fantasy feasts and how food has been used as a worldbuilding tool in fantasy novels.  
*Fran Wilde (M), Ms. Nicole Kimberling, Rei Rosenquist, Gillian Polack, Giovanni De Feo*

2363 Workshop 170 minutes CCD: Wicklow Room-5

Diane will accompany workshopers through a three-hour mini-curriculum, including an hour's discussion of the tools and techniques that writers bring to writing in general and the workshoping experience in particular; one hour in active workshoping/critique of selected works submitted by participants, looking at how critique is done as it's done; and one hour in open Q&A about writing in general, and editing/critiquing one's own work and others'. Participants will examine ways to critique responsibly, how to make the best use of workshops, and how to organise their own workshops in future, with an eye to specific genres.

2408 Panel 50 minutes Point Square: Odeon 1

Political and economic inertia has led us to expend minimal effort in the effective use of our resources, to the detriment of the environment and our species. Our panel will explore what we can do to manage the resources that we have, and whether we can do so to the benefit of all species on this planet.

2393 Talk 50 minutes Point Square: Odeon 5  
We are surrounded by technology that is simple to use and minimal to look at; it's all too easy to forget that this simplicity is a veneer. Take a glimpse at what lies beneath.

- 17:00 **Is literary escapism good for kids?**  
2522 Panel 50 minutes CCD: ECOCEM Room  
Fantasy regularly tops the lists of must-read – and much loved – books for children. However, some critics (and parents) still worry about the effect of escapism on immature imaginations. Why do so many children enjoy fantasy? What can fantasy do that realism can't? With on-point examples and compelling arguments, our panel of lifelong fantasy lovers take a look at the role fantastical fiction plays in the development of young readers.

But is that always the case? Our panel of queer fans will discuss their relationship to fandom, how it's sometimes let them be more themselves than they can in other places... and sometimes not.

 2498 Panel 50 minutes CCD: Wicklow Hall 2B  
 Marvel properties on the big screen have often been lambasted as having poorly conceptualised depictions of women: is this deserved? From the introduction of Black Widow through the animated Spider Gwen to the wild popularity of Shuri and Okoye from *Black Panther* and now Captain Marvel as a leading lady, have women acquired better stories or just more screen time? What still needs improving? And how do the Marvel women compare to the critical acclaim of DC's Wonder Woman?

## Thursday Programme Schedule

---

- 18:00 **Speculative open mic**  
2573 Group reading 50 minutes CCD: Liffey Room-2  
Speculative poetry is a creative space with a lot of lyrical potential and vibrancy, but many people don't get enough chances to hear their work read aloud before an audience as often as writers in other styles of poetry do. Poets and fans gather together in an intimate and encouraging space to share and listen. Poetry, flash fic, and filk are all welcome!  
*Brandon O'Brien (M)*
- 18:00 **Graphic novels in YA**  
2555 Panel 50 minutes CCD: Wicklow Hall 2B  
Comics targeting YA audiences are increasingly popular, often challenging assumptions about who reads comics and what they want to read. Some YA comics are also featuring more diverse voices, as creators and characters. What does this success say about the comics market? Can YA comics offer writers more opportunities? And what are the must-read YA graphic stories?  
*D Franklin (M), Marieke Nijkamp, Shivaun Hoad, Seanan McGuire*
- 18:00 **Talking animal characters in SFF**  
2558 Panel 50 minutes CCD: Wicklow Hall-1  
Science fiction and fantasy have a long history of anthropomorphic animals in both children's and adult novels. What is the attraction of talking animals? Can they be seen as a commentary on the human condition? What are the pitfalls and opportunities offered by this anthropomorphism?  
*Lise Andreasen (M), Robert V. S. Redick, RJ Barker, Virginia, Adrian Tchaikovsky*
- 18:00 **The Enchanted Duplicator**  
2579 Play 80 minutes CCD: Liffey-B (Second Stage)  
Dublin 2019 is thrilled to present the world premiere of the stage musical adaptation of *The Enchanted Duplicator*, the classic of Irish fanwriting by Walt Willis and Bob Shaw. *The Enchanted Duplicator* features Jophan in what is often described a fannish parody of John Bunyan's *The Pilgrim's Progress* (although Willis and Shaw ascribed their version's origins to *The Dark Tower*, a radio play by Louis MacNeice who was also from Belfast). Written and directed by Erwin (Filthy Pierre) Strauss.  
*Mr. Erwin S. (Filthy Pierre) Strauss (M), Ms Rowan Jessop, Adi Loya, Mark Bernstein, Ms Yulia Syromolot, Mr Ralf Bayer*

*Zaza Koshkadze*
- 18:30 **Illustration or fine art?**  
2582 Panel 50 minutes Point Square: Stratocaster BC  
The same painting that is a mere illustration on a book cover might be considered 'fine art' when it's framed and hung in a gallery. Are there techniques, approaches, or subjects that bring a work closer to illustration or to fine art? Where is the line, and who gets to draw it?  
*Eric Scott Fischl, Dominic Riemenschneider MA, Tara Ferguson*
- 19:00 **Building an intelligent world**  
2600 Panel 50 minutes CCD: Liffey Room-1  
Through AI, smart cities, meshed Internet of Things, and global connectivity, we are building an intelligent, almost sentient, world. Does this intelligent world enable or disable us? Are we reducing our need for human intelligence through reliance on such a world? Will our intelligent world eventually see humanity as we see animals: as smart creatures but limited in their mental capacity?  
*Christopher Husberg (M), Ian Watson, Mika Koverola, Hadas Sloin*

## Thursday Programme Schedule

---

- 19:00 **How close are we to Frankenstein's dream?**  
 2585 Panel 50 minutes CCD: Liffey Hall-2  
 Science has been making progress in rebuilding bones, growing organs, and transplants. Researchers recently succeeded in restoring a mammal's brain from cryogenic freezing, leading to speculation about 'head transplants'. How close does this bring us to the vision of the 'Modern Prometheus'? What are our current capabilities and ethics behind the science?  
*Dr Helen Pennington (M), Heidi Lyshol, Dr Anatoly Belilovsky, D.A. Lascelles*
- 19:00 **Sexy beasts: nonhuman pairings in SFF erotica**  
 2588 Panel 50 minutes CCD: Wicklow Hall 2B  
 For authors of paranormal romance and SFF erotica, sex scenes sometimes have the added complexity of merging nonhuman bodies, emotions, and lifestyles. How have authors dealt with differing alien anatomy? How do predatory characters resist the urge to eat their lovers? How do witches avoid accidentally cursing their partners in the throes of passion? The possible pairings are endless!  
*Ciaran Roberts (M), Kate Johnson, Kat Harvey, K.M. Szpara*
- 19:00 **Creating wonderful new worlds**  
 2591 Panel 50 minutes CCD: Wicklow Hall-1  
 Contemporary speculative fiction features a wonderfully diverse selection of authors, stories, and worlds. Drawing on cultures, histories, mythologies, and landscapes (or something completely new), how do authors develop just the right world to tell their tale? From technology to petticoats, the devil is in the details. So what does it take to make a perfect world? What can we learn from some of today's fiction about how to do it right and wrong?  
*Gordon Van Gelder (M), Tanya DePass, Mrs Emma Newman, Simon R Green*
- 19:00 **Superfight: anime**

- 20:00 **Does an AI need a body?**  
 2615 Panel 50 minutes CCD: Liffey Hall-2  
 Does an AI need a body, or do we need to see an AI in a body to recognise it is 'alive' or sentient? Why are we so obsessed with assigning gender, or gender characteristics, to an entity that is basically a software spark in a hardware system that doesn't rely upon organic reproductive systems?  
*Dr Máire Brophy (M), Prof Dave Lewis, Maquel A. Jacob, Manny Frishberg*
- 20:00 **Opening Ceremonies, featuring the 1944 Retro Hugo Awards**

- 21:00 **Making the asexual textual**  
2642 Panel 50 minutes CCD: Wicklow Hall-1  
In the past, many asexual and/or aromantic characters in science fiction and fantasy stories have not been overtly identified this way. Should writers be more explicit in stating asexual and aromantic characters' identity? How do asexuality and aromanticness shape and change the way characters and their relationships with others are perceived or written?  
*Darcie Little Badger (M), Wendy Metcalfe, Dr Edmund Schluessel, Jasmine Gower*
- 21:00 **Horse sense**  
2639 Panel 50 minutes CCD: Liffey Hall-2

The panel will discuss many aspects of horse knowledge such as: how fast cavalry can charge or travel in a day, how much and how often horses eat, how they are trained, and what makes a good rider. They will also consider who writes horses well, what do horses add to a story, and is it always necessary to get it 'right' if the story is good?  
*Sarah Pinsker (M), Patrice Sarath, Mike Scott, Linda Antonsson*

- 10:00 **Nothing about us without us: disability in YA**  
3027 Panel 50 minutes CCD: Liffey Hall-2  
Every reader deserves to see themselves reflected in stories; that also holds true for disabled readers, although disabled main characters are still few and far between. What does disability look like in YA literature? How has representation changed over the last few years? Which titles are must-reads and which stories are still untold? And why is it so important to include disabled creators in the discussion?  
*Marieke Nijkamp (M), Peadar Ó Guilín, Fran Wilde, Victoria Lee*
- 10:00 **Space opera: boldly going where no genre has gone before!**  
3081 Panel 50 minutes CCD: Liffey Room-2  
Space opera, science fiction's beloved subgenre, has changed a lot since the Golden Age. Some predicted it wouldn't survive long into the 21st century, but space opera has not only survived: it's thriving, with a new generation of writers boldly taking it in new directions. The panel will discuss current trends in space opera and how they see it evolving in the future.  
*Mr Adam Whitehead (M), Rivers Solomon, Martha Wells, Bo Balder*
- 10:00 **The ethics of secret power**  
3069 Panel 50 minutes CCD: Wicklow Room-4  
Science fiction and fantasy often includes secret societies or even entire secret cultures, possessed of extraordinary knowledge and abilities. The audience enjoys being invited into a world cut off from mundane society, but the implications of that amount of power often lie unexamined. What are the risks and benefits of secrecy or exposure? Which works or authors question these power dynamics?  
*Marcus Gipps (M), E. C. Ambrose, Stephanie Katz, Taiyo Fujii*
- 10:00 **Apollo at 50**

Getting men on the Moon was certainly an achievement, but it is nearly 50 years since anyone was there and the Apollo launchers, unlike Soyuz, have been abandoned for years. Beyond the obvious spectacle, was Apollo all for nothing? Was the spectacle itself enough? Panellists consider the legacy of Apollo.  
*Ian Sales (M), Jeanette Epps, Dr David Stephenson, Geoffrey A. Landis, Mary Robinette Kowal*
- 10:00 **Short fiction of 2018**  
3066 Panel 50 minutes CCD: Wicklow Room-3

*Alasdair Stuart (M), Jonathan Strahan, Sheila Williams, Neil Clarke*
- 10:00 **How I learned to stop worrying and love Hollywood**  
3057 Presentation 50 minutes CCD: ECOCEM Room  
People often complain about how bad the science and engineering is in science fiction TV shows and movies. While there are some terrible howlers that just will not die, this presentation explains how and why things have actually become a lot better over the last 15 years, how specific storytelling and production concerns – not stupidity or laziness – drive many decisions by TV- and film-makers, and how excessive nitpicking could actually be harmful to improving science literacy.  
*Stephen Cass*

## Friday Programme Schedule

---

- 10:00 **How to tell science from pseudoscience**  
3063 Panel 50 minutes CCD: Wicklow Room-2  
At a time when facts are questioned and science is often viewed through a sceptic's eyes, how do we know what scientific findings are real or correct? We will discuss how to weed out science from pseudoscience as well as the effects of incorrect science being accepted as fact. And what happens when science goes wrong? How do we clean up a pseudoscience mess?  
*Stephen Nelson (M), Eugene Doherty, Sam Scheiner, Cristina Macia*
- 10:00 **YA book to film adaptation**  
3030 Panel 50 minutes CCD: Wicklow Hall 2B

3060 Workshop 50 minutes CCD: Wicklow Room-1  
It can be difficult to understand exactly how to make the change from being a player in roleplaying games to running games for friends or convention attendees. Come along to this panel to get some advice from experienced GMs on how to make this switch, and what would be helpful to know in the beginning.  
*Alyc Helms, Michael Cule, Eli Schulman*
- 10:00 **Writing beyond king and colony**  
3033 Panel 50 minutes CCD: Wicklow Hall-1  
Fantasy novels often use monarchy, SF often relies on corporate governance, and space operas are full of planetary colonies. What other paradigms can writers bring to systems of government? What should they keep in mind when creating a new structure or repurposing an existing framework? What models can they follow? And what pitfalls should be avoided for stories set here on Earth, in a fantastical world, or on a far distant planet?  
*Sean Hazlett (M), Joe Abercrombie, Brenda Clough, Natasha Bardon*
- 10:00 **Storytelling workshop with Diane Duane**  
3096 Children's Programme 50 minutes Spencer Hotel: Columba 2

## Friday Programme Schedule

---

- 10:00 **P/Faerie Tale – pop-up #2**  
 3072 Play 50 minutes CCD: Wicklow Hall 2A  
*P/Faerie* is a new movement play. 'F' is not in the Philippine alphabet; 'ae' is in the Gaelic alphabet. Putting a slash between two letters can make a word exclusive or inclusive. Putting a wall between any nations – say, the land of Faerie and the mortal realm – could arguably also be exclusive or inclusive. Depends which side you're on. This Saturday, 17 August, will be the first – albeit truncated – version of this play ever seen onstage (it has only existed in staged readings at Capricon and was originally created as a short for the Solstice Arts Centre in Co. Meath). Though we have the costumes, the puppets, the props, the people, we'd like the audience to help us decide which 'side' these elements fall on. Are they Diwata? Are they Sidhe? Are they mortal? We have some idea but we'd like you to participate in the final say.
- Therefore, please join us on **Thursday 15 August** for a 30-minute discussion of the Diwata, faeries of the Philippines. Help us to decide if what we're planning to put onstage on Saturday really represents what we tell you about the Diwata. After all, who wouldn't wanna talk about Diwata?
- On **Friday 16 August**, join us for a 30-minute discussion of the Sidhe, faeries of Ireland. The playwright admits that, even though she received her doctorate in Theatre History from TCD, she's not Irish; she really wouldn't want to claim authority on this, so please help her out here (just be gentle).
- And then, on **Saturday 17 August**, join us for the hour-long world premiere of *P/Faerie Tale*.
- A few weeks before the Worldcon, we will be releasing an audio recording of the first scene of the play, which we will not be performing in Dublin. It's a prequel, which should not be necessary to listen to before the show but which will enhance the events at the convention. About the play: Mara, an Irishwoman, heartily disapproves that her son married her former caregiver, Naomi, a Pilipina. But Naomi needs Mara's help, because the one-year-old child of the union has been abducted by faeries and Naomi cannot battle Irish faeries (Sidhe), having only ever encountered Philippine ones (Diwata). Are P/Family ties stronger than P/Faerie magic, or will the bitter P/Feud between the two women leave a child beyond the pale P/Forever?
- Dr Ruth Palileo, Jonathan East, Zack Georgian, Ginger Leopoldo, Amy Flood, Oscar Hernández Rodríguez, Niamh Clancy*

 3126 Panel 50 minutes Point Square: Odeon 1  
 The media portrays scientists as lone geniuses making brilliant discoveries conducted in isolation, with no lab assistants or colleagues. But increasingly science is actually performed by large teams. What is it like to actually work in science, and what are the implications for how and why science is done?  
*Noelle Ameijenda PhD (M), Prof Jocelyn Bell Burnell, Dr Helen Pennington, Dr David L Clements*
- 10:30 **'You read my mind': telepathy in SFF romance**  
 3111 Panel 50 minutes Point Square: Odeon 5  
 Whether it's the ability to read your partner's mind or mutual telepathic communication, telepathy adds the potential for both conflict and closeness in a romantic relationship. In what ways do science fictional and paranormal romance novels use telepathy? What are the potential pitfalls and complications of writing a mind-reading character?  
*Donna Maree Hanson (M), Sarah Rees Brennan, Chelsea Mueller*
- 10:30 **Star Trek: Discovery season 3**  
 3117 Panel 50 minutes Point Square: Odeon 3

## Friday Programme Schedule

---

- 10:30 **Have publishers got your back?**  
3114 Panel 50 minutes Point Square: Odeon 4  
Artists and authors are the public face of books and comics and, as a result, can be the main targets of online abuse when fans take offence at something. Should publishers protect the creators of the work they are marketing? In what ways do publishers offer support at times like these? Is there or should there be a difference if the work is being done on commission, rather than originating from the author or artist?  
*Tara Ferguson (M), Paul Cornell, Atlin Merrick, Ms Catherine Cho*
- 10:30 **With fans like these, who needs enemies?**  
3108 Panel 50 minutes Point Square: Alhambra  
We've all seen them: the fans who think they have a right to make life miserable for creators. Why is it that science fiction and fantasy work attracts this type of person more than other genres? When does loyalty become a sense of entitlement? When does passion become toxic? What makes a fan want to damage the genre they claim to love?  
*Debra Jess, Avner Shahar-Kashtan, Robert S Malan, Russell A Smith*
- 10:30 **Myth and horrors**

Even with the shifting trends of pouches and jackets in the 1990s and black leather in the 2000s, we can't seem to escape from the impractical and revealing four-colour standard. Can we update costumes for the new millennium?

## Friday Programme Schedule

3219 Panel 50 minutes Point Square: Odeon 4  
We are in a new millennium, a literal Brave New World. Surely much of the fiction of the 20th century no longer holds relevance? The panel will discuss the fiction of the past and how it can still be relevant in the 21st century. 3216 Talk 50 minutes Point Square: Odeon 5  
We're having global conversations about climate change and human impacts on Earth's biosphere. What some may not know is that random acts of human terraforming have brought us to the brink of disaster before. *Lex Beckett*
- 11:30 **Colonising the Kuiper Belt and the Oort Cloud**  
3231 Panel 50 minutes Point Square: Odeon 1

3204 Book launch 60 minutes Point Square: Warehouse 2  
- Performance space  
Dave O'Neill welcomes all to the launch for Trunk Line book 2: *Fetch!* Utopia comes at a price. Well, that was the opinion of the founders of the Liberty Cluster, a small group of stars orbiting in the empty space between two of the galaxy's arms. As it turned out, the price for liberty was medicine, good dentistry, and toilet paper. The crew of the *Astra*, fresh from their near-death experience at Sirius, are made yet another offer they really should have had the sense to refuse. Heading into the dark to look for a famous lost starship, they make First Contact with a suspiciously familiar-looking alien species. The universe really seems to be going to the dogs, but there's nothing sad about these puppies. *Trunk Line* and *Fetch!* will be available, as will light refreshments.

The panel will discuss trends in translated genre fiction as well as possible future directions.

How relevant are the issues they foresaw, whether or not the details were correct? What contemporary works are looking at the future 40 years from now, and which do we think portray more or less plausible futures?  
*Dyrk Ashton, Annalee Newitz, Rick Wilber*

In 2010, an article entitled 'Why There is No Jewish Narnia' caused a stir by suggesting that Jewish authors didn't write fantasy because Judaism 'is a science fiction religion ...collective, technical, and this-worldly.' This was widely argued online, butwhere are we now, nearly a decade later? The panel will discuss fantasy inspiredby and drawing on Jewish cultural traditions, themes, and myths.

- 12:00 **Done to death: the art of killing characters**  
3237 Panel 50 minutes CCD: Liffey Hall-2

*Dr David L Clements (M), Dr Sarah Tolmie, Shana Worthen, E. C. Ambrose*

- 13:00 **The power of representing ourselves in fanfiction**  
 3363 Panel 50 minutes CCD: Wicklow Room-2  
 When they don't see themselves on the page or on the screen, fans often reimagine characters, or find space in the canon for representation that wasn't originally there, by creating their own head-canons of gender, sexuality, race and (dis)ability. Our panel talks about the power of representing ourselves by rewriting beloved characters, and discusses some of their favourite head-canons.  
*Ciaran Roberts (M), A.J. Hackwith, Kat Kourbeti, Juliet Kemp*
- 13:00 **Sharp storytelling**  
 3366 Panel 50 minutes CCD: Wicklow Room-3  
 Remember the greatest sword fight from the *The Princess Bride*? Or Darth Vader's duel with Obi-Wan? How about Aragorn versus the Nazgûl? There can be only one! Bob Anderson was an Olympic competitor turned swordmaster/fight choreographer who knew how to tell a story with weapons. Our panellists will analyse how he did it.  
*Thomas Árnfelt (M), Rachel Hartman, Zoë Sumra, Mr Ingvar Mattsson, Peter Morwood*

There will be a d20.

## Friday Programme Schedule

---

- 13:30 **Earth Abides 2.0: what happens post-apocalypse**  
3408 Panel 50 minutes Point Square: Odeon 3  
*Earth Abides* detailed the incremental ways in which society collapses after the apocalypse. Other assumptions of post-apocalyptic worlds include inevitable reductions to barbarism, tribalism, or senicide. Considering that certain fundamental knowledge (e.g. germ theory) wouldn't get reset to zero and that society can be collaborative, are the aftermaths completely dire?  
*Renee Sieber (M), Dr. J.S. Fields Ph.D., William Ledbetter, Alisa Hellstrom, Carrie Vaughn*
- 13:30 **The Vikings are coming!**  
3411 Panel 50 minutes Point Square: Odeon 2  
Many novels use Viking elements, whether they are retelling myths or basing their society on Norse history. What common tropes appear in Norse fantasy? Is there a conflict between the popular image of the fierce marauder and the historical realities of the period? Does there need to be a factual basis for Viking stories, or are the tropes so strong that historical accuracy would seem somehow 'less Viking'?  
*Emil Hjörvar Petersen (M), Dr Stephan Grundy, Kari Sperring, Annie Bellet*
- 13:30 **Everyone is invited: LGBTQIA+ in comics**  
3417 Panel 50 minutes Point Square: Odeon 1  
Despite the lack of earlier representation, there have always been queer fans of and professionals working in comics. Now with creators being more vocal and visible members of the LGBTQIA+ community, we're seeing characters who don't even need to come out but are written and drawn with queer text rather than subtext. Let's talk about what's out there, where to find it, and what we'd all like to see more of!  
*Gavia Baker-Whitelaw (M), Jacq Applebee, Rosa Devine, Diana M. Pho*
- 13:30 **So you want to write a SFF stage play**  
3399 Panel 50 minutes Point Square: Alhambra

Our panellists will share tips and tricks on adapting between mediums for the stage, how to create believable characters, and how to write great dialogue.  
*KT Bryski (M), Tomasz Kozlowski, Jeanne Beckwith, Professor Fiona Moore, Stefan Rudnicki*
- 13:30 **What just happened at the Business Meeting?**  
3420 Panel 50 minutes Point Square: Stratocaster BC  
The WSFS Business Meeting can be intimidating to those who have never participated in it. This panel will go into the technical details about what happened at this morning's Business Meeting, with an emphasis on the technical parliamentary rules rather than the substance of the proposals being discussed. This may include instruction in how the relevant parliamentary procedure works.  
*Donald Eastlake III*
- 13:30 **New technologies for artists**  
3405 Panel 50 minutes Point Square: Odeon 4  
New technologies are changing the way some artists create. How are these advances changing their process? The panel discusses what new approaches are available with technological advances in recent years.  
*Arwen Grune (M), Yuan (Shuang ChiMu) Feng, James Brophy*
- 13:30 **Trends in fan art**  
3402 Panel 50 minutes Point Square: Odeon 5  
Our definition of fan art has been evolving from work printed in fanzines to images posted online, and in style from illustrations to include crafts and other forms of art. How do newer mediums fit in the fan art category? Are the traditional venues for fan art still around? What 'fan art' mean to you?  
*Sue Mason (M), Ariela Housman, Meg Frank, Teddy Harvia, Likhain*

- 14:00 **Cultural appropriation: a product of a shrinking world?**  
 3423 Panel 50 minutes CCD: Liffey Hall-2  
 White SFF authors have historically appropriated other cultures to add depth and excitement to their characters: The Wheel of Time takes the culture of POC and gives it to the Aiel, and Frank Herbert appropriates Islam and applies it to the Fremen. With relatively easy access to travel and digital information these days, how can we make use of a range of influences while avoiding cultural appropriation?  
*Dr Wanda Kurtçu (M), Michi Trota, Fulvio Gatti*
- 14:00 **Can fiction convince people when facts can't?**  
 3462 Panel 50 minutes CCD: Wicklow Room-2  
 Do people need to understand a subject to care about it? Can stories be used to help people understand when the facts are not enough? There are plenty of current issues where the facts are known but large sections of the public are not convinced (as with climate change, vaccinations etc.). This panel will explore the use of stories to help people understand the science.

*Gerri Sullivan (M), Liz Zitzow, Mason A. Porter, Dave O'Neill*

## Friday Programme Schedule

- 14:00 **You have to laugh: humour in YA**  
3483 Panel 50 minutes CCD: Liffey Room-2  
What with all the struggles of growing up, finding love, saving the world, and overthrowing dystopias, YA literature has a lot of serious business to take care of. But laughter is an outlet too. Is there room for laughter in YA? What kinds of humour do you find in the genre, how are they used, and is there a generation gap when it comes to what's funny anyway?  
*Gail Carriger (M), Prof David Farnell, Ellen Klages, Sarah Rees Brennan*

What resources are available and where does the writing community gather, learn, create, and publish their work locally?  
*Gareth Hanrahan (M), Ian McDonald, Diane Duane, Jo Zebedee*
- 14:00 **All the universe's a stage...**  
3477 Panel 50 minutes CCD: Liffey Room-1  
...and all the men and women (and robots, and wizards) merely players. William Shakespeare was a Jedi master at creating characters and building tension on stage. What can he teach us about how to craft a compelling genre character, and how to make completely unrealistic situations and people feel real, given the limitations of whatever medium we choose?  
*Kate Heartfield (M), Elsa Sjunneson-Henry, Greer Gilman, Simon R Green*
- 14:00 **Pitch perfect**

- 14:30 **What we want to see: representation in comics**  
 3519 Panel 50 minutes Point Square: Odeon 2  
 While superhero comics have explored questions of identity from their inception, most main characters have traditionally been white, cis, men. Although there have been exceptions, marginalised main characters existed, quite literally, in the margins. In recent years mainstream comics have become more inclusive, but still not everyone feels represented. Let's talk about what's there and what's still needed.

3510 Panel 50 minutes Point Square: Odeon 5  
Which came first: technology that inspired science fiction, or science fiction that inspired science? It's like the chicken and the egg scenario as science drives SF as much as SF drives science. Why is that? What discoveries do we see in science fiction that have found their way into labs and real life? What real-life science are we still waiting to see in our science fiction? Join us for a fun and exciting chat about science, science fiction, and exciting new ideas!

3534 Panel 50 minutes CCD: Liffey Hall-2  
Fairy tales have an abiding allure, and successive generations of writers have taken these traditional themes and tropes and reshaped them for a modern audience. Sometimes the setting is changed but the roots of the story remain; sometimes authors use the reader's familiarity with a tale to subvert expectations. Why is it that fairy tales lend themselves so well to repetition? In what ways are modern authors shaping fairy tale tropes? The panel will examine the popularity of fairy tales through the lens of modern retellings.  
*Lucy Hounsom (M), E. Lily Yu, Mari Ness, Sara Norja, Jean Bürlesk*

- 15:00 **Falling in love with science fiction**  
3585 Panel 50 minutes CCD: Liffey Room-1  
How did you fall in love with science fiction? What keeps the interest alive? People get into, and stay into, SF and genre for many reasons: they read the right story at the right time, saw the movie that grabbed them, were pulled into the world of a special game or comic. People also make a difference; someone says, 'Read this!' when you're new, or when you're jaded – and the world changes. Let's explore the wonders of finding and staying in love with SF. (And the rest of the SFF genre!)  
*Simon Litten (M), Jennifer Zwahr-Castro, Shaoyan Hu, Ebba Svegelius Gunnarsson*
- 15:00 **Introduction to SFF romance**

Elon Musk and others believe that technology can and will save the world. Can tech handle growing demands on the earth for resources? Can we invent our way out of climate change? We talk GMOs, nanotech, geo-engineering, and also our faith in tech as a 'get out of gaol free' card.  
*Ed Fortune (M), Anna Gryaznova LL.M., Elliot Craggs, Madeline Ashby*

3567 Panel 50 minutes CCD: Wicklow Room-1

3624 Talk 50 minutes Point Square: Stratocaster BC  
Why does the world need sustainable technology for air conditioning and refrigeration? 3609 Talk 50 minutes Point Square: Odeon 4  
The human brain and mind have been topics of fiction since time immemorial, but our stories don't always keep up with the science. The classic science fictional frameworks of the last fifty years have produced a lot of great stories, but a better understanding of the brain can lead us to new stories and new ideas. And how do we revive and/or reshape new epic tales that are rooted in Europe's fantastic past?

- 16:00 **Using SFF as sandboxes for ideas on politics and society**  
3672 Panel 50 minutes CCD: Wicklow Room-3  
Speculative fiction can offer readers and writers a space, removed from 'real' life, to explore and criticise society and politics and offer possible solutions. From the economy of your galactic empire to the status of dwarves in your epic fantasy, it is impossible to separate the political from the fantastical, and SFF is a great place to imagine other ways of existing.  
*Nicholas Whyte (M), Sam Hawke, Eyal Kless, Taiyo Fujii*
- 16:00 **Buying your first guitar**  
3678 Workshop 50 minutes CCD: Wicklow Room-5

*Valerie Housden*
- 16:00 **Educating children in how to avoid a dystopia**  
3669 Panel 50 minutes CCD: Wicklow Room-2  
Dystopian and utopian societies are popular in YA novels like *The Hunger Games*. However, serious ethical concerns about technology and sustainable resources, as well as complicated political structures, are often glossed over. What should children know about the dangers associated with these societies? What environmental and human costs are presented in fictional worlds, and how do they relate to the real world?  
*Dr Wanda Kurtçu (M), Amy Sundberg, Dr Glyn Morgan, Nicole Givens Kurtz*
- 16:00 **Expanding the storyverse with tie-in novels**  
3633 Panel 50 minutes CCD: Wicklow Hall 2B  
Media tie-in novels have long been a staple of the wider genre, as eager readers consume books within the Star Wars, Buffy, and superhero universes, and more! Why are these media franchise books so popular? What does it take to write one? Are they just regurgitations of video content, or something more? What should authors looking to write a tie-in novel, and readers looking to read one, know about this subgenre?  
*Martha Wells (M), Diane Duane, Pat Cadigan, D.B. Jackson*
- 16:00 **The return of the space cowboy: Westerns in space**  
3666 Panel 50 minutes CCD: Wicklow Room-1  
The influence of the Western on science fiction can be traced from the pulp era; it ranges from the subtle inclusion of tropes like the lawless frontiers of Star Trek and *The Expanse*, through cowboy imagery in *Afro Samurai* to literal horses in *Firefly*. The panel will discuss their favourite examples of space Westerns in media and literature, and why the genre has had such a lasting appeal.

3675 Panel 50 minutes CCD: Wicklow Room-4

How do you go about inventing a language for an alien race or fantasy culture? A panel of conlangers (language inventors) discuss language creation and examples of successful invented languages in literature and TV/film.  
*Hanne-Madeleine (Iro) Gates Paine (M), P. M. Freestone, Joseph Malik*

3690 Panel 50 minutes CCD: Liffey Room-2  
YA readers and writers are often asked when they are moving on to adult fiction, or 'real' books. Is YA just a gateway to other fiction, speculative or not? What's the effect on YA readers? Do they move on? Should they? Or does YA have a greater, ongoing appeal to readers and writers, teen and adult? Our panellists discuss the history and relationship between YA and the other speculative genres.  
*Carrie Vaughn (M), Kate Elliott, Sam Bradbury, Joe Abercrombie*

 3717 Panel 50 minutes Point Square: Odeon 3  
 Water has provided SFF with a rich source of inspiration. Its presence (or absence) colours every climate change story and gives us drowned worlds, desert planets, or eerielow-gravity waves on a terraformed Mars. Water is the setting for journeys of 20,000 leagues and contact with minds beyond our own. This panel will discuss how water can shape themes, settings, and narratives in SFF stories.

- 16:30 **Ethics**  
3720 Workshop 50 minutes Point Square: Odeon 6  
(Academic)  
Business Info Systems, UCCAutors: Dr Carolanne Mahony, Dr Simon Woodworth, Dr Ciara Heavin, Prof Joseph Feller (not attending)Many of us are now living our lives in a digitally connected world with nearly ubiquitous access to information and to individuals. We form deep everyday relationships with, and dependencies upon, our technologies. Being digital has transformed how we work, play, engage with one another, and understand and define ourselves. We generate and consume an ever increasing amount of data, personal and otherwise, and we continually expand and intensify the domain of technology's impact. In such a world, Mark Zuckerberg's motto 'Move fast and break things', while inspiring, may not be the ideal approach. Not everything that is easily broken can be as easily fixed. In business, education, and society, innovations in areas such as data analytics, artificial intelligence, augmented reality, and the Internet of Things (IoT) continually create both new opportunities and new challenges. This panel is an opportunity to address three key questions:
- How do we ensure that tomorrow's technology leaders have both the innovation and ethical decision-making skills they need?
  - How do we ensure that students are cognisant of the wider implications of technological innovation, both positive and negative?
  - How do we cultivate a personal sense of responsibility for managing these implications?
- Stories have power. Good stories expand our awareness, providing access to new places, people, and situations. Great stories go further to transform our awareness, challenging us to critically imagine new futures, perspectives, and values. We are accustomed to taking seriously the stories of our observable past; we call this history. This panel challenges us to take seriously the stories of our imaginable future; we call this science fiction. Please join us for a lively and open conversation between the panellists and audience, exploring together the potential of using science fiction in different ways to teach ethics in computing and innovation modules in higher education. While the panellists will put forward their own opinions and ideas, they are ultimately there to raise difficult questions, not provide easy answers. The session will focus on gathering insights from the audience and collectively developing ideas on how to challenge students to think critically, ethically, and creatively as they shape our digital future.  
*Dr Carolanne Mahony (M)*
- 16:30 **Reading: Catherynne Valente**

Do they consider themselves a part of the same futurist tradition, or separate? The panel will discuss visions of the future from world cultures, how they are influenced by the root cultures they draw from, and how (if at all) they relate to Afrofuturism.

3729 Panel 50 minutes CCD: Wicklow Hall 2B  
From robots to sentient drones to cyborgs, our not-quite-human creations continue to fascinate, inspire, and break our hearts. As different as Star Trek's Data is from Iain M. *Karina Steffens (M), M V Melcer, Mika Koverola, William Ledbetter*
- 17:00 **Grappling with the post-colonial in SFF**  
3756 Panel 50 minutes CCD: Wicklow Room-1  
Over the last 500 years, cultures and histories have been forever altered by colonial expansion. Although many former colonies have gained independence, their peoples still grapple with the effects of colonisation. Can post-colonial SFF help to heal the past? - 17:00 **Censorship in SFF and comics**  
3783 Panel 50 minutes CCD: Liffey Room-2  
Our genre has long been subject to censorship and control (D&D, monster movies). This has led to suppression or trends towards 'vanilla' (safe) content. How do we protect creative expression? How much should we hold to account companies that profit from characters dedicated to justice, inclusion, and diversity while pandering to consumers who are against all of that?  
*Prof Dave Lewis (M), Roz Kaveney, Sienna Saint-Cyr, Mikko Rauhala*
- 17:00 **Modern alternatives to classic boardgames**  
3762 Panel 50 minutes CCD: Wicklow Room-3

The panel will reframe genre romance and recommend their favourite titles and authors.

Fairview Park's parkrun is a three-lap course on grass and tarmac that brings runners within shouting distance of Bram Stoker's former residence in Marino Crescent. After the parkrun, some of us may grab a coffee with other parkrunners in a local café; otherwise, feel free to return to the convention (about a 30 minute walk or ten minutes by bus). This event is free, but if you don't already have a parkrun bar code, please register, print your barcode, and bring it with you. (Your barcode can then be used for any of the other 630+ parkruns in the world.) Cosplayers would be especially welcome!

- 11:30 **Concert: Kerri-Ellen Kelly**  
4207 Concert 50 minutes Point Square: Warehouse 2  
- Performance space  
Kerri-Ellen Kelly is the manager of (and singer in) vocal ensemble Court & Country (which has sung at midwest SF and filk conventions as well as Chicon 7, OVFF, FKO and Confluence). She is also a solo musician in her own right. In addition to singing as a mezzo soprano, she plays or is learning to play multiple instruments including horn, trombone, soprano recorder, bagpipes, baritone ukulele, guitar, violin, and mandolin – at widely varying levels of competency. Her love of both research and early music have caused her to include numerous medieval and renaissance songs in her repertoire, with a particular fondness for bawdy Elizabethan ballads (especially in her historical persona as Lady Margrett Norwoode). However, she also loves more modern music and filk tunes, and writes her own original music. One of her original pieces was the third place winner in the 2017 Iron Filker contest at OVFF. Her name is a tongue twister waiting to happen; feel free to call her Kerri.  
*Kerri-Ellen Kelly*

Their goal is to give access to the speculative future of gender, racial issues, and feminism as developed by SF works.

4267 Panel 50 minutes CCD: Wicklow Room-1

How does social media fit into this, and what pitfalls does it present? Our panellists will discuss building structures that can support their members and resist trolls and other organised online disruptions.

- 12:00 **Narrative and the dollar: understanding contemporary TV**  
4237 Panel 50 minutes CCD: Liffey Hall-2  
TV has always been at the mercy of commercial imperatives. On network TV, the 'best' episodes air during sweeps week, and plot is structured around ad breaks. On streaming services, shows experiment with new structures, but with mixed results. How should viewers adjust their expectations? What is 'good TV' today? Will 'TV novels' come to dominate? Is there still a role for the anthology show?  
*Greg Chivers (M), Mr Adam Whitehead, Abigail Nussbaum, Dr Douglas Van Belle, Michael Cassutt*
- 12:00 **Invisible work: mothers and caregivers in SFF**

The panel will discuss the depiction of mothers and carers in SFF and how it aligns with the politics of motherhood in the wider world.  
*Ms Sylvia Spruck Wrigley (M), Aliette de Bodard, Kate Elliott, Rivers Solomon*

- 12:00 **Beady Pocket**  
 4240 Talk 50 minutes CCD: Wicklow Hall 2B  
 Beady pockets were a hip pocket that Traveller women wore. In modern times the beady pocket could be seen as a purse or a practical handbag. Women kept small items in it: a comb, sewing kit, or spare buttons. When families were being moved on or evicted, women gave each other buttons as a keepsake of their friendship and time on the road together; the buttons would then be sewn onto the outside of the beady pocket. Over the course of a lifetime, a woman's beady pocket would become full with an eclectic range of buttons and memories. Rosaleen McDonagh's *Beady Pocket* written piece attempts to capture the historical years of the beady pocket phenomena with a modern twist.

There is often a mixture of organic elements, such as bamboo, with machine-driven tech, that creates an evocative backdrop to silkpunk stories. The panel will introduce silkpunk's origins and influences as well as literature that has a silkpunk aesthetic.

- 12:30 **Mythmaking workshop**  
4327 Academic 50 minutes Point Square: Odeon 6 (Academic)  
A round table discussion looking at ways in which the techniques of mythmaking from genre fiction have become part of our everyday lives in the traditional and non-tradition news media. Fiction has a legacy of this, from Dianetics and Scientology to the Illuminati and the World of Darkness. These myths range from obvious fiction, like Slender Man, to systemised frameworks, like QAnon. They can even include traditional news media networks when they focus on editorial opinion and false equivalence in the interest of balance, accidentally lending credence to counter-theories based on false information.  
As mythmakers and storytellers, authors of science fiction, fantasy, and horror are the best authority on the creation and utilisation of myth in fiction. The focus of this discussion is to explain the use of these tools and identify comparisons between them and fake news equivalents that we see every day.

- 13:00 **Muslim SFF**  
4384 Panel 50 minutes CCD: Liffey Room-2  
Muslim SFF is a blanket term for works written by and about Muslims, but it is not defined by a single ethnic group or nationality. From Zakariya al-Qazwini's 13th-century *Awaj bin Anfaq* – about an alien who visits Earth – to the recent popularity of authors such as G. Willow Wilson and Saladin Ahmed in the Anglophone world, how does Muslim SFF reflect and comment on the culture of Islam?

She has known John Douglas, also a fan turned pro, since 1970, and has been married to him since 1975 – so it made sense that he be the person to ask her a bunch of questions about life, the universe, and everything. She has promised that she will answer them. Most of what she says will probably be true...

- 13:00 **Alternate Apollos**  
4345 Panel 50 minutes CCD: Wicklow Hall-1

Panellists consider alternate histories of Apollo.

 National epics – such as *Beowulf*, *Táin Bó Cúailnge*, *Ramayana* and the *Epic of Gilgamesh* – seem to capture something true and recognisable about a nation's history and character. For modern writers, they can be a tempting but daunting source of inspiration. ## Saturday Programme Schedule

---

- 14:00 **Relationships with sentient AIs in science fiction**  
4426 Panel 50 minutes CCD: Liffey Hall-2  
Sentient AIs are common in SF stories. Do writers use a sentient AI as a way to avoid making that character sexual? How does an AI's lack of sexuality, or birth gender, allow writers to explore relationships in new ways?  
*Karolina Fedyk (M), Wendy Metcalfe, Adam Wing, Derek Kunsken*
- 14:00 **Window to the soul: a character's favourite song**  
4471 Panel 50 minutes CCD: Wicklow Room-4  
Creators often use a character's musical choices to show us their inner thoughts and hidden motivations: in *Guardians of the Galaxy* the music Peter plays is a link to his lost mother, in *Spider-Man: Into the Spider-Verse* Miles's favourite song places him as a member of Generation Z, and Alex's callous rendition of 'Singin' in the Rain' in *A Clockwork Orange* has gone down in infamy. Join our panellists for a walk through our favourite characters' musical memories.  
*Rebecca Gomez Farrell (M), Seanan McGuire, Joao Goncalves, Kieron Gillen*
- 14:00 **Dystopian SF: how utopias go wrong**  
4429 Panel 50 minutes CCD: Wicklow Hall 2B  
In SF there is no such thing as a utopia. Or, at least, anything that seems on the surface to be a utopia usually isn't for everyone. The panel will discuss the concept of utopias and whether there can be one that isn't ultimately harmful for some aspect of society, giving examples from a range of SF sources. How can the ideals of a perfect world be twisted into something dark and dystopian?  
*Su J. Sokol (M), Anne Charnock, Charlie Jane Anders, Tom Toner, K.M. Szpara*
- 14:00 **Beyond binary**  
4462 Panel 50 minutes CCD: Wicklow Room-1  
This panel seeks to explore the concept of gender in SFF. In particular, it will focus on societies in literature and other media that do not follow binary definitions of gender. 4483 Panel 50 minutes CCD: Liffey Room-2

With kickass heroines like Alanna, Daine, Kel, Aly, and Beka, and stories exploring sexism, class, war, abuse, and discrimination, the books were groundbreaking works of children's fantasy. This panel discusses Tortall, its stories, its heroines, and its influence on YA fantasy.

*Steve Davies (M), Bill Burns, Caroline Mullan, Mary Burns, Mike Scott*

## Saturday Programme Schedule

- 14:00 **P/Faerie Tale**  
 4486 Play 90 minutes CCD: Liffey-B (Second Stage)  
*P/Faerie* is a new movement play. 'F' is not in the Philippine alphabet; 'ae' is in the Gaelic alphabet. Putting a slash between two letters can make a word exclusive or inclusive. Putting a wall between any nations – say, the land of Faerie and the mortal realm – could arguably also be exclusive or inclusive. Depends which side you're on. This Saturday, 17 August, will be the first – albeit truncated – version of this play ever seen onstage (it has only existed in staged readings at Capricon and was originally created as a short for the Solstice Arts Centre in Co. Meath). Though we have the costumes, the puppets, the props, the people, we'd like the audience to help us decide which 'side' these elements fall on. Are they Diwata? Are they Sidhe? Are they mortal? We have some idea but we'd like you to participate in the final say.
- Therefore, please join us on **Thursday 15 August** for a 30-minute discussion of the Diwata, faeries of the Philippines. Help us to decide if what we're planning to put onstage on Saturday really represents what we tell you about the Diwata. After all, who wouldn't wanna talk about Diwata?
- On **Friday 16 August**, join us for a 30-minute discussion of the Sidhe, faeries of Ireland. The playwright admits that, even though she received her doctorate in Theatre History from TCD, she's not Irish; she really wouldn't want to claim authority on this, so please help her out here (just be gentle).
- And then, on **Saturday 17 August**, join us for the hour-long world premiere of *P/Faerie Tale*.
- A few weeks before the Worldcon, we will be releasing an audio recording of the first scene of the play, which we will not be performing in Dublin. It's a prequel, which should not be necessary to listen to before the show but which will enhance the events at the convention. About the play: Mara, an Irishwoman, heartily disapproves that her son married her former caregiver, Naomi, a Pilipina. But Naomi needs Mara's help, because the one-year-old child of the union has been abducted by faeries and Naomi cannot battle Irish faeries (Sidhe), having only ever encountered Philippine ones (Diwata). Are P/Family ties stronger than P/Faerie magic, or will the bitter P/Feud between the two women leave a child beyond the pale P/Forever?
- Dr Ruth Palileo (M), Jonathan East, Zack Georgian, Ginger Leopoldo, Amy Flood, Oscar Hernández Rodríguez, Niamh Clancy*

How do writers decide the level of technological regression they want for their post-apocalyptic world? What are some examples of convincing regressions, and what can this aspect of worldbuilding offer to readers?

John Scalzi sits down to talk with Diane Duane about the ups and downs of a life given over to SFF and genre TV and film. Other topics: crossing the streams of fandom and prodom, the cohabitation of art and married life, the intersection of writing and quirky food habits, and possibly the dead rising from the grave, human sacrifice, and dogs and cats living together... Actually, maybe the cats more than the dogs. In fact, a whole lot more.  
*Diane Duane, John Scalzi*
- 15:00 **Changing climates, changing worlds**  
4582 Panel 50 minutes CCD: Liffey Room-1  
In August 2018 William Gibson tweeted: ‘All imagined futures lacking recognition of anthropogenic climate-change will increasingly seem absurdly shortsighted. Virtually the entire genre will be seen to have utterly missed the single most important thing we were doing with technology.’ The panel will discuss visions of the world transformed by the changes in the climate.  
*Libia Brenda (M), Olav Rokne, Russ Colson, Cat Sparks*

## Saturday Programme Schedule

- 15:00 **The use of SF in higher education**  
4570 Panel 50 minutes CCD: Wicklow Room-2  
Professors from different disciplines discuss the possible uses of speculative fiction as a tool for teaching. From humanities to sciences via legal studies, how have academics used SFF in the classroom in the past, and how can we dream of speculative fiction – and the technology it posits! – being used in future?

- 15:00 **Nonhuman and interspecies communication**  
4576 Panel 50 minutes CCD: Wicklow Room-4  
There is much to be learned by terrestrial, yet nonhuman, lifeforms that communicate within and between species. We have already learned a lot from language experiments with great apes, parrots, and dolphins. What more do these animals and others have to teach us about communicating with lifeforms beyond the Earth, should we ever meet?

- 15:00 **What I learned along the way**

Our panellists share the ups and downs of a writing life.  
*Ian R MacLeod (M), Alette de Bodard, Karl Schroeder, George Sandison, Nina Allan*
- 15:00 **Building inclusion and equity into genre**  
4591 Panel 50 minutes CCD: Liffey Room-2  
Diversity and inclusion remain a challenge in science fiction, fantasy, and horror. Let's look at the market today compared to five or ten years ago and determine what kind of progress has been made. Considering today's stats, what diversity-specific goals would we like to achieve in the near term? Moreover, as the genre publishing industry struggles to diversify, what can we do to help publishers press forward on this front, and how can we help to support diverse authors and readers? And what more should we be doing to help bolster diversity in our fiction?  
*Brenda Noiseux (M), Rafeeat Aliyu, Jacq Applebee, Julia Rios*
- 15:00 **What do aliens look like?**

- 15:30 **Running a post-apocalyptic convention**  
4633 Panel 50 minutes Point Square: Stratocaster BC

What would we even talk about if there are no new books, films, TV shows, or even the internet? Join our panellists as they come up with absurd and sobering ideas for running a convention after the end of the world... which we hope won't be next week.  
*Heidi Lyshol (M), Norman Cates, Isabel Schechter, Jukka Särkijärvi*
- 15:30 **Graphic novel adaptations of genre work**  
4624 Panel 50 minutes Point Square: Odeon 2  
Is there such a thing as a good adaptation of a pure prose text? While some people argue that movies can never live up to the reader's imagination, graphic novels have fewer limits and can add a significant visual element to our favourite genre literature. But they still might not look 'right', and a picture might not always be worth losing a thousand words. Join us to consider the challenges!  
*Holly Black (M), Victoria "V.E." Schwab, Gail Carriger, Raya Golden*
- 15:30 **Signature style**  
4630 Panel 50 minutes Point Square: Odeon 1

*Bryan Talbot (M), Kaja Foglio, Ms Sultana Raza*
- 15:30 **Crafting your fandom**

*Cheryl Morgan*

- 16:00 **Problems for future historians**  
4681 Panel 50 minutes CCD: Wicklow Room-4  
Pity the poor historians of the 22nd century. The Brexit Bus, 'New Phone, Who Dis?', and 'SAD!' will be dissertation topics, and they'll need to explain to puzzled undergraduates how both left and right decided to wear yellow vests. But, as we have seen with the disappearing websites of the 1990s, how will they manage their task when so much of our present day culture leaves no physical trace?  
*William Frank (M), Adrienne Foster, Dr Katja Kontturi, Russell A Smith, Mr Grzegorz Aleksander Biały*

After a critically acclaimed run with Dark Horse, Star Wars comics returned to Marvel in 2015, giving new depth to existing characters (Princess Leia, Darth Vader) and introducing new fan favourites (Doctor Aphra, the Second Sister). Should the comics follow the big screen more closely, or vice versa?

Douglas Adams was right about the sheer scale of the universe, and just how difficult it is to grasp that scale. In this workshop, we hope to help sci-fi writers, artists, and fans to get a sense of that scale, and also point out a number of other simple tricks to help add a dose of realism to sci-fi. This workshop is also intended to discuss how fandom can help bring the wonder of science to a wider audience and the opportunities to learn from science fiction.

- 17:00 **Luddites of SF**  
4789 Panel 50 minutes CCD: Liffey Room-1  
Not all SF evangelises about technology; many genre works actively critique it. Can SF reclaim the original meaning and change the narrative?

- 17:00 **The history of censorship and information control**  
4741 Panel 50 minutes CCD: Wicklow Hall-1  
Panellists consider how censorship and technology have influenced the dissemination of information through time and across the world, particularly when that information runs counter to the status quo. Has anything changed with advancements in tech; have the revolutions in information availability been successful? Or is it the same old intellectual property, societal preservation, and corporate control?  
*Dr. Deb Geisler (M), Ada Palmer, Kelvin Jackson, Mikko Rauhala*
- 17:00 **Tall technical tales**  
4795 Panel 50 minutes CCD: Liffey Room-2

- 17:00 **Gender and the writer**  
4774 Panel 50 minutes CCD: Wicklow Room-1

Death Ingloria's debut album *The Wolf Onboard* is a complete science fiction story told across seven songs, a seven page comic book, and seven animated videos which play out during Death Ingloria's performances.  4825 Panel 50 minutes Point Square: Stratocaster BC  
 The last decade has repeatedly demonstrated the central role of protest in politics. From the Women's March in DC to the Arab Spring, protests have played a vital role in shaping the political conversation. How does SF reflect this reality? Is there room for protest in heroic fiction, or do these types of stories only leave space for violent resistance?  
*Ranylt Richildis (M), Abigail Nussbaum, Mary Anne Mohanraj, Paolo Bacigalupi, Veronica Roth*

- 18:00 **Introduction to Afrofuturism**  
 4831 Panel 50 minutes CCD: Wicklow Hall 2B  
 Afrofuturism blends the African diaspora with science, technology, and philosophy. The term was coined in 1994 by Mark Dery, but discussions surrounding the validity of a term not created by the community it references have led to other names for the subgenre, including: the Black Fantastic, African futurism, CyberFunk, and Sword and Soul. Probably the most well-known recent example is *Black Panther*, but the subgenre includes a wide range of art, music, and literature. Our panel will give an introduction to the topic and offer recommendations.  
*Maquel A. Jacob (M), Afua Richardson, Brandon O'Brien, Rivers Solomon*

## Saturday Programme Schedule

---

- 18:00 **The popularity of livestreaming games**  
 4864 Panel 50 minutes CCD: Liffey Room-1  
 One of the most common reactions we hear when talking about  
 livestreaming is: 'You want to *watch* other people play games? Why?!' On  
 this panel, we discuss why streaming on platforms like Twitch has been  
 exploding in popularity in recent years.  
*Ciaran Roberts (M), Tanya DePass, Avery Delany, Eli Schulman*
- 18:00 **How not to make feudal mistakes**  
 4867 Panel 50 minutes CCD: Liffey Room-3  
 Why are there so many feudal societies in fiction when, in reality, the feudal  
 system largely didn't exist in its popularised form? Why do fantasy authors  
 keep coming back to it? What problems and benefits are there to feudalism  
 in fantasy and why does it make historians cringe? This panel will explore  
 the popularity of medieval feudalism in fantasy and consider the possible  
 alternatives.  
*Jeanine Tullos Hennig (M), Kari Sperring, Dr Anna Smith Spark, Mr Micah  
 Yongo*

- 18:00 **Children's books: the gateway drug**  
 4870 Panel 50 minutes CCD: Liffey Room-2  
 For most of us, exposure to sci-fi and fantasy starts as children. At what  
 point does imaginative children's book illustration start being labelled  
 'fantasy'? What creators influenced you? How aware are these two  
 industries of each other? We talk to people who've had experience of both.  
*Oisín McGann (M), Gili Bar-Hillel, Holly Black, Lee Moyer, Ben Hennessy*

- 19:00 **The appeal of the gumshoe in SFF**  
 4879 Panel 50 minutes CCD: Wicklow Hall 2B  
 From Harry Dresden to Peter Grant, Takeshi Kovacs to Doré Konstantin,  
 the hard-bitten gumshoe character has been transposed into a wide range  
 of SFF settings. With a shared origin within the pages of pulp magazines,  
 it's no surprise that detectives and science fiction have had a long shared  
 history. This panel will discuss the ways in which tropes from detective  
 fiction have been adapted by authors of SFF into a multitude of genres.  
*Virginia (M), Nicole Givens Kurtz, Jon Courtenay Grimwood, Robin  
 Duncan, Matthew Hughes*
- 19:00 **Science and politics of water**  
 4882 Panel 50 minutes CCD: Wicklow Hall-1  
 Water is life. Twisting a line from Frank Herbert: 'He who controls the water  
 controls the universe.' Our planet is covered by 70% water, our bodies  
 comprise 70% water, and most plants contain 90% water. What other roles  
 does water play in our technologically savvy world? How has water shaped  
 our political landscape, in a time of rising tides and warming oceans? What  
 can we do to protect our most precious resource?  
*Sam Fleming (M), Darcie Little Badger, Dr Tad Daley, Paolo Bacigalupi*

## Saturday Programme Schedule

---

- 19:00 **In the background: class in YA fiction**  
 4900 Panel 50 minutes CCD: Liffey Room-2  
 For too long, with honourable exceptions, the 'generic' YA protagonist was white, non-disabled, cishet, middle class. In recent years, YA is working hard to become more inclusive. But what does class mean in YA fiction? (And, perhaps, in access to books?) Are there role models for people from every background? And is it easier to deal with a fictional class system than a real one?  
*Marieke Nijkamp (M), Avery Delany, Caroline Hooton, Victoria Lee*
- 19:00 **Audio dramas and radio plays**  
 4894 Panel 50 minutes CCD: Liffey Room-1  
 With the rise of paying markets like Big Finish Productions and Audible Theater, a new era in professional audio theatre has dawned. But how do you go about writing or recording an SFF audio drama or radio play – and are they even the same thing? In this suddenly booming industry, where do you start? And what is the demand for this type of work?  
*Jeanne Beckwith (M), Phil Foglio, Roger Gregg, Professor Fiona Moore*
- 19:00 **Narrative and storytelling for games**  
 4876 Panel 50 minutes CCD: Liffey Hall-2  
 The manner in which games create narratives has led to, arguably, some of the most compelling storytelling presented in any form. How does this form of narrative differ from more established forms in literature? What unique opportunities and constraints does this medium present to writers and narrative designers, as well as players?  
*Dr Carlos Hernandez (M), Carrie Patel, Nicolette Stewart, Yen Ooi*
- 19:00 **Walls and Windows**  
 4891 Play 50 minutes CCD: Wicklow Hall 2A  
**Adult content warning.** Fishamble Theatre presents Mary Murray in a reading of excerpts from *Walls and Windows* by trailblazing playwright Rosaleen McDonagh. It is a play about the accommodation crisis: what happens when a young Traveller woman is put into a hotel room and has her children taken from her? *Fishamble* is an Olivier Award-winning, internationally acclaimed, Irish theatre company which discovers, develops, and produces new work across a range of scales. *Rosaleen McDonagh* is a Traveller woman with a disability. She worked in Pavee Point Traveller & Roma Centre for ten years, managing the Violence Against Women programme, and remains a board member. She is a regular contributor to the *Irish Times* and has written within the framework of a Traveller feminist perspective. *Mary Murray* has appeared in over 40 television and film productions. Most notably she played the role of Janet in *Love/Hate* for RTE. She has toured China, the United States, and Europe in numerous theatre productions and been awarded best actress and supporting actress awards by the *Irish Times*, MAMCA and the First Irish, New York.

- 12:00 **Vampires in Society**  
5267 Paper 50 minutes CCD: Wicklow Room-4  
Kathleen Hunt, *Vampires in Society* Bram Stoker was an Irish author, most famous for writing about the undying influence of dangerous "others" in English society, whom he personified as vampires infecting upstanding citizens. Dracula served as a metaphor for Stoker's syphilis infection, slowly driving him mad, as well as a comment on the way that many Irish people viewed the English interlopers as "killing from within." What was it that gave Stoker's novel, a long and involved semi-travelogue of a horror story, more archetypal staying power than previous vampire stories in the UK, such as Polidori's *The Vampyre*, the extremely popular penny-dreadful Varney the Vampire, or even the lush and sensual *Carmilla*? What does the Dracula story tell us about our fears of "otherness", and how can we become stronger by embracing that which we fear?

*Steven Erikson*
- 12:00 **Polyamory in theory and practice**  
 5264 Panel 50 minutes CCD: Wicklow Room-3  
 Resources abound for how to get started in opening up your relationship, but how do you make polyamory work in the real world? What do you do when your relationship styles seem to clash with those of your partners? How can you set effective boundaries with metamours? In this panel, we'll tackle some of the harder questions that come up when theory meets practice.  
*Kris "Nchanter" Snyder (M), Ian Paul Power, Mary Anne Mohanraj, Rei Rosenquist*
- 12:15 **Concert: Kerri-Ellen Kelly**  
 5291 Concert 50 minutes Point Square: Warehouse 2  
 - Performance space  
 Kerri-Ellen Kelly is the manager of (and singer in) vocal ensemble Court & Country (which has sung at midwest SF and filk conventions as well as Chicon 7, OVFF, FKO and Confluence). She is also a solo musician in her own right. In addition to singing as a mezzo soprano, she plays or is learning to play multiple instruments including horn, trombone, soprano recorder, bagpipes, baritone ukulele, guitar, violin, and mandolin – at widely varying levels of competency. Her love of both research and early music have caused her to include numerous medieval and renaissance songs in her repertoire, with a particular fondness for bawdy Elizabethan ballads (especially in her historical persona as Lady Margrett Norwoode). However, she also loves more modern music and filk tunes, and writes her own original music. One of her original pieces was the third place winner in the 2017 Iron Filker contest at OVFF. Her name is a tongue twister waiting to happen; feel free to call her Kerri.  
*Kerri-Ellen Kelly*
- 12:30 **Academics and acolytes: learning in SFF worlds**  
 5315 Panel 50 minutes Point Square: Odeon 4  
 Whether they're apprenticed to an assassin, a grunt in basic training, downloading knowledge from an online academy, or learning spells from wizardly professors, characters often need to gain skills and qualifications of some kind. How and when they do this is an important element of worldbuilding and there are endless options. What does it tell us about the Discworld that wizards attend university and witches are apprentices? How does Starfleet Academy differ from the Imperial Academy? From Hogwarts to Brakebills to the Oha Coven, how does magical instruction differ?  
*Dr. Shaun Duke (M), Karen Simpson Nikakis, Prof. Kenneth Schneyer, Ali Baker*
- 12:30 **How did you get here?**  
 5309 Panel 50 minutes Point Square: Alhambra  
 Some artists find their niche early and stick with the same industry their whole life. Others have more... varied CVs. We talk to some artists who've taken a less than direct route to their chosen careers.  
*Siobhan Murphy (M), Grace P. Fong, Fred Gambino, Scott Lefton*
- 12:30 **Introduction to Irish crochet lace**  
 5306 Workshop 110 minutes Point Square: Warehouse Art Demo Area  
 Irish crochet lace was created as a faster way to make lace items that looked similar to expensive Italian/French needle laces. Using ordinary crochet stitches, we'll create an Irish crochet motif that can be used as a brooch or to decorate a piece of clothing. Knowledge of basic crochet stitches is required to successfully participate in this workshop. Sign-ups in advance will be required (limited to 10 people) with a small fee for supplies.  
*Constanze Hofmann (M)*

## Sunday Programme Schedule

- 12:30 **All of biology in 60 minutes or less**  
5321 Talk 50 minutes Point Square: Odeon 2

*Sam Scheiner*
- 12:30 **Introduction to orbital mechanics**  
5312 Talk 50 minutes Point Square: Odeon 5  
In space battles what happens to bullets? It's unexpected: speed up to slow down, aim low to hit high. To get it right, hard SF authors need extensive knowledge of orbital mechanics. We'll discuss bullets, and how astronauts and satellites are put into orbit. We'll look at computer simulations of orbital mechanics, and manoeuvres needed to get astronauts up and back down in one piece.  
*Jim Doty PhD*
- 12:30 **A history of deadly fashions**  
5318 Talk 50 minutes Point Square: Odeon 3

*Joe Hill*
- 13:00 **Older characters and older authors**  
5372 Panel 50 minutes CCD: Wicklow Room-3  
A decade ago, the media would label an author of 50 as 'older'. Today, more writers are beginning their careers in their 60s and 70s. Do these older writers write and champion older characters, or is there still pressure to appeal to a younger demographic with equally young protagonists? What are the advantages and disadvantages of becoming a full-time writer at an older age?  
*Kari Sperring (M), Wendy Metcalfe, Sam Fleming, Faith Hunter*
- 13:00 **Gods, religion and atheism in the genre**  
5336 Panel 50 minutes CCD: Wicklow Hall 2B  
Gods and religion are often an integral element of SFF worlds; they offer ways to build conflict and to explore alternative philosophical concepts. How have authors tackled the creation and inclusion of religion in their worldbuilding? Is it possible for atheism to exist in worlds where gods literally walk among the people?  
*Naomi Kritzer (M), Derwin Mak, Dominic Riemenschneider MA, Ehud Maimon, Meg MacDonald*

## Sunday Programme Schedule

---

- 13:00 **The dark side of the Moon: an interview with Ian McDonald**  
5333 Interview 50 minutes CCD: Liffey Hall-2  
From a terraforming Mars to a near-future India short on water (but flush with AIs), and then back to the libertarian Moon, the work of Ian McDonald spins the threads of society, people, and SF into a tapestry of wonder. Peadar Ó Guilín will examine and unwind the threads, and may or may not enquire into the merits of a good gin.  
*Peadar Ó Guilín (M), Ian McDonald*
- 13:00 **The canon conundrum**  
5369 Presentation 50 minutes CCD: Wicklow Room-2  
In 2014, in one fell stroke, Walt Disney erased 30 years of Star Wars canon and replaced it with a new canon. But... can they even do that? Who defines what is canon or not? Why does Star Wars have a fixed, regulated canon, while Tolkien's canon evolved with his rewritings, and *Doctor Who* makes do without any whatsoever? In this talk we'll cover the history of canonicity, from Sherlock Holmes to Batman, and talk about why it *matters* to the fandom.  
*Avner Shahar-Kashtan*
- 13:00 **In memoriam**  
5387 Panel 50 minutes CCD: Liffey Room-2  
The panel will celebrate the lives and works of SFF authors and editors we have sadly lost in the past year, including: Pat Lupoff, Dave Duncan, Carol Emshwiller, Betty Ballantine, Vonda M. McIntyre, and Gene Wolfe. We will discuss their place in the history of SFF as a whole, as well as their individual contributions to the genre.
- 13:00 **Wands at the ready! Magical worldbuilding in SFF**  
5339 Panel 50 minutes CCD: Wicklow Hall-1  
When worldbuilding with magic, is it enough to add magic to our existing social structures, or does some magic alter the way the world works? There are soft magic systems with few rules and hard magic systems with lots of rules; does this affect the ways magic shapes the narrative? Arthur C. Clarke said: 'Magic is just science we don't understand yet.' At what point does magic become science?  
*Christopher Husberg (M), Zen Cho, Diane Duane, Justin Call*
- 13:00 **Why are so many romantic aliens humanoid?**  
5378 Panel 50 minutes CCD: Wicklow Hall 2A  
There is a wealth of human/alien romance but, although they might have scales or extra arms, aliens are mostly depicted as humanoids. Are there any romantic aliens with other forms, or does it become too difficult to create a believable attraction? The panel will discuss how the SF romance genre portrays alien life and the possible reasons for those portrayals.  
*Laurel Anne Hill (M), Lauren James, K.M. Szpara, David D. Levine*
- 13:00 **Game writing and the story**  
5375 Panel 50 minutes CCD: Wicklow Room-4  
Games have stories, whether complex or simple, and they follow a progressive path from beginning to end. Other than this structure, what does it take to write a story within a game? What are the elements of a game story? Do they differ from how a literary story is constructed? If so, how? And how do you make a game story compelling enough to keep players coming back again and again?  
*Legendgerry (M), Cathriona Tobin, Ira Alexandre, Dr Allen Stroud, Conor Kostick*
- 13:00 **Getting published and staying published**  
5363 Panel 50 minutes CCD: ECOCEM Room  
You have a two-book deal with a mainstream publisher. Huzzah! But, after those two books, what happens next – not just immediately, but across years? Panellists share their experiences and expectations, offering advice and notes on what they wish they had known.  
*E. C. Ambrose (M), Patrick Nielsen Hayden, George Sandison, Michelle Sagara, Rachel Winterbottom*

## Sunday Programme Schedule

---

- 13:00 **Internet, censorship, control, and influence**  
 5366 Panel 50 minutes CCD: Wicklow Room-1  
 Innovations on the internet transformed the ability to have global conversations about politics, but also heightened capacities for censorship and control. Have these affected the internet's original doctrine? Do they provide greater transparency or muddy the water? We'll discuss the evolution of the idea behind censorship and control as applied to the internet in terms of law and modern society.  
*Rebecca Gomez Farrell (M), PRK, Kelvin Jackson, El*
- 13:00 **Chairs interview Chairs**  
 5381 Interview 50 minutes CCD: Liffey Room-1  
 The convention chairs of LoneStarCon 3 (The 71st World Science Fiction Convention), Renovation (The 69th World Science Fiction Convention), and the original Chicon (The 2nd World Science Fiction Convention) talk about the experience of chairing a Worldcon then and now(-ish).

 5360 Kaffeeklatsch 50 minutes CCD: Level 3 Foyer  
*Fulvio Gatti*
- 13:30 **Diverse voices, better science**  
 5435 Panel 50 minutes Point Square: Odeon 1  
 Many people regard science as an accurate and neutral view of the world – yet philosophers and historians of science argue that science is not objective. Biases occur in science such as choosing what to research, which data to collect, and how to share that knowledge. Panellists consider how diverse voices can improve science, for example by questioning existing approaches or proposing new ones.  
*Corry L. Lee Ph.D. (M), Prof Jocelyn Bell Burnell, Darcie Little Badger, Dr Stewart Hotston*
- 13:30 **The art of myth and legend**  
 5429 Panel 50 minutes Point Square: Odeon 2

*Oisin McGann (M), Jim Fitzpatrick, Claudia Fusco, Ms Sultana Raza*

## Sunday Programme Schedule

---

- 13:30 **Unashamed BIOS**  
5426 Talk 50 minutes Point Square: Odeon 3  
'The more fingers you lose, the harder it is to pick them up.' Wise words there from Twitcho, the unicycling knife-juggler. But what does that have to do with the nature of reality, or the reality of nature? Amateurfessor Michael Carroll presents a new and only marginally terrifying way of putting the very fabric of the universe through the economy rinse. *In honour of Bob Shaw's Serious Scientific Talks.*  
*Michael Carroll*
- 13:30 **Marketing and promotion: the writer's website**  
5417 Panel 50 minutes Point Square: Alhambra  
When people think about marketing and promotion for creators, it's usually social media that comes to mind. Websites are often overlooked, overly complicated, or out-of-date. This panel isn't about web design, but rather about the things a writer should include on their website, things that are helpful and nice, and things that should just never, ever, be done.  
*Lydia Gittins (M), David Demchuk, Sara-Jayne Slack, Ben Galley*
- 13:30 **Queering the worldbuilding**  
5420 Panel 50 minutes Point Square: Odeon 5  
Speculative fiction offers so many opportunities to step outside western constraints of gender and sexuality. From JY Yang's refusal to assign gender or sex at birth in the Tensorate sequence to Ann Leckie's rejection of societal gender in the Ancillary sequence, from Ursula K. Le Guin's Sedoretu to Homestuck's alien romantic structure, how does spec fic queer its worlds? And how else can it stretch to do so?  
*Jaime Garmendia III (M), Sarah Gailey, Elizabeth Bear, Hal Duncan, Helen Corcoran*
- 13:30 **Method acting in space**  
5402 Workshop 80 minutes CCD: Wicklow Room-5  
This workshop adapts an introductory Stella Adler method acting technique for actors performing in outer space! We'll teach you the basics of how to truthfully live and move in an imaginary setting.  
*Caryn Liz*
- 13:30 **Get us out of the Twilight Zone: the work of Jordan Peele**  
5438 Panel 50 minutes Point Square: Stratocaster BC

*Chris M. Barkley (M), Dr Andrew M Butler, Dr Wanda Kurtçu*
- 13:30 **Irish small press comics**  
5423 Panel 50 minutes Point Square: Odeon 4  
Ireland is full of Indie comics, zines, independent artists and illustrators – but few of their works have made it out of local circulation. If you're local, come and talk about your favourites; and if you're from out of town, come and see what you've been missing out on!  
*Kevin Weldon (M), Paul Carroll, David Ferguson, Rosa Devine*

## Sunday Programme Schedule

---

- 13:30 **Global perspectives on Chinese science fiction**  
5432 Workshop 50 minutes Point Square: Odeon 6  
(Academic)  
The rise of a new wave in Chinese science fiction has caused a worldwide news sensation and reshaped SF as a new global genre. The politics and poetics of Chinese SF have both been controversial. On the one hand, some observers identified the flourishing of Chinese science fiction as an indicator of China's rise as a new global power. Debates on the nature of Chinese SF, in particular a recent debate on *The Wandering Earth* (2019), a film based on Liu Cixin's short story, have often involved ideological conflicts. On the other hand, critics have also identified in the new wave of Chinese SF a dark and subversive side that speaks either to the 'invisible' dimensions of the reality, or simply the impossibility of representing a certain 'reality' dictated by the discourse of mainstream realism. On its most radical side, the new wave of Chinese SF has been thriving on an avant-garde literary spirit that connects this generation of Chinese writers to earlier authors as well as authors writing outside mainland China, who thought and wrote beyond the conventional ways of perceiving reality, so that they could reform the Chinese mind (re-form China) and fashion new literary modes. The current new wave of Chinese SF has represented a continued effort of this intellectual strength. This roundtable gathers experts in science fiction studies and Chinese literary studies, as well as major writers from China, asking some key questions about the phenomenon of Chinese science fiction: What happens to science fiction as a global genre when Chinese SF becomes one of the new gravitational centers of the genre? What remains invisible, aesthetically, politically, ethically, epistemologically, geographically, when Chinese SF moves into the center stage? What is the Sinophone science fiction? What did some of the new discoveries of the genre's earlier samples in Hong Kong and Singapore say about its cultural dynamics? How do we write a literary history including science fiction?  
Organiser and moderator: Mingwei Song (Associate Professor, Wellesley College) Participants: David Der-wei Wang (Edward C. Henderson Professor, Harvard University), Yan Feng (Professor, Fudan University), Zhang Feng (Professor, Peking University, Graduate School in Shenzhen), Regina Kanyu Wang (writer, Storycom), Stanley Qiufan Chen (writer), Emily Xueni Jin (postgraduate, Wellesley College)  
*Mingwei Song (M), Regina Kanyu Wang, Yuan (Shuang ChiMu) Feng, Dr Feng Zhang, Stanley Qiufan Chen, Emily Xueni Jin*

5411 Play 75 minutes CCD: Liffey-B (Second Stage)  
It's Dante's Fire Con! Danya and Honey need to fight their way through a steampunk army, devil cats, a psychic wannabe-boyfriend, and the absence of Honey's sister to meet their hero: the one, the only, Samagashi! A love letter to geeks of all stripes, *Geek!* celebrates the power of fandom, conventions, and cosplay to forge connections and bring fantasy to life. This amateur production of *Geek!* is presented by special arrangement with SAMUEL FRENCH LTD, a Concord Theatricals Company.  
*Liz Bragg (M), Sarah Kriger, Michael Lake, Madryn McCabe, Jackie Mahoney, Amanda O'Halloran*
- 13:30 **Reading: Ramsey Campbell**  
5405 Reading 20 minutes CCD: Liffey Room-3  
*Ramsey Campbell*
- 14:00 **How national identity is portrayed in SFF**  
5477 Panel 50 minutes CCD: ECOCEM Room  
Speculative fiction can offer authors a space, removed from reality, to consider questions of national identity. How do nations respond to disasters? Do authors use cultural stereotypes as a shorthand for national identity, and where have these come from? The panel will discuss the ways SFF provides a window into how nations view themselves and others, and what that means in a broader context.  
*Abigail Nussbaum (M), Anna Gryaznova LL.M., Dr. Bradford Lyau*

## Sunday Programme Schedule

---

- 14:00 **Things that SFF writers often get wrong: logistics**  
5489 Panel 50 minutes CCD: Wicklow Room-4  
That's not how it really works! Organisational planning and logistics often get overlooked or written wrong – whether it's the time needed to hunt and cook an animal in the forest, or to develop the cure for a disease. Timing, availability, and coordination of things often get pushed into a grey area where good logistical planning goes to die. What does it take to get these details right? When the details don't work within the story, how does an author work around them? Our panellists share their own experiences, including what they have got right and wrong along the way.  
*D.A Lascelles (M), Ginjer Buchanan, Brian Smith, Yoon Ha Lee*
- 14:00 **Satire and the fantastic**  
5501 Panel 50 minutes CCD: Liffey Room-2  
From Swift's satire of 18th century society in *Gulliver's Travels* to the satirical commentary on bureaucracy in Douglas Adams's *The Hitchhiker's Guide to the Galaxy*, SFF is perfectly placed to lampoon and criticise the politics and society of the 'real' world. How is satire used in modern SFF? Is dystopian fiction inherently satirical? The panel will discuss the links between satire and the speculative.  
*Heide Goody (M), Ju Honisch, Roger Gregg, Juliana Rew*
- 14:00 **Imagining disabled futures**  
5480 Panel 50 minutes CCD: Wicklow Room-1  
Speculative fiction has always shaped the conversation about our future. The dearth of solid, accurate depictions of disability, or even hints of disability, in worldbuilding affects how we imagine. How do we build a speculative future for inclusion of disability? How can SFF stop harming disabled readers? How will disability change in a world with constantly evolving technology? There's a whole future out there, and disabled people will be part of it.  
*Kerry Buchanan (M), Elsa Sjunneson-Henry, Sarah Pinsker, Nick Wood, Marieke Nijkamp*
- 14:00 **Born sexy yesterday**  
5492 Panel 50 minutes CCD: Wicklow Hall 2A  
Too many heterosexual relationships in SFF, especially on screen, are still rooted in stereotype and cliché: conveniently fragile women, toxically entitled men, and pervasive, usually unacknowledged, power imbalances. Which relationships in current popular media buck this trend to provide more thoughtful depictions of love and partnership?  
*Atlin Merrick (M), R.W.W. Greene, Ciaran Roberts, RJ Barker, Nikki Ebright*
- 14:00 **The art of collaboration**  
5495 Panel 50 minutes CCD: Liffey Room-1  
Collaboration isn't always easy – learning to work with others, even your friends, can be tricky – but it can create some amazing results. Our participants share their experiences, advice, and questions as they reveal the joys and pitfalls of partnered art.  
*Gerald M. Kilby (M), Rosanne Rabinowitz, Alicia Zaloga, Mark Stay, J. Sharpe*
- 14:00 **What agents want**  
5483 Panel 50 minutes CCD: Wicklow Room-2  
A good agent is hard to find. So what are they looking for? Do they even know? How does an author attract an agent's attention? And how does a person determine if Agent X is the right person for them, or if they are better off looking for someone else or striking out on their own? Our select group of agents share their advice, thoughts, desires, and favourite finds.  
*Lucienne Diver (M), John Berlyne, Joshua Bilmes, Juliet Mushens*
- 14:00 **Science experiments**  
5507 Children's Programme 50 minutes Spencer Hotel: Columba 2  
Children's writer and scientist Christine Taylor-Butler shows how to change water density with salt and float eggs, how to float paper clips using surface tension, and how to make a gas and use it – properly!  
*Christine Taylor-Butler*

- 14:30 **The Jetsons was my gateway SF**  
5531 Talk 50 minutes Point Square: Odeon 2  
How science fiction helped me to appreciate real science, learn to face challenges, and become an advocate for women in STEM.  
*Anne-Marie Flaherty*
- 14:30 **Perry Rhodan: world's greatest SF series**  
5528 Talk 50 minutes Point Square: Odeon 3  
Perry Rhodan, a German SF series, has been published weekly since 1961. The series spans more than 3,000 episodes, making it the longest continuous story since writing began. More than 2 billion copies of Perry Rhodan stories have been sold worldwide. Robert Corvus will present the Perry Rhodan phenomenon and introduce a universe full of alien races, artificial life, cosmic powers, mutants – and more!  
*Robert Corvus*
- 14:30 **Unanticipated benefits of space programmes**  
5519 Panel 50 minutes Point Square: Alhambra  
Which everyday technologies were developed for space programmes? Much of our tech wasn't invented for the mass market; it was designed for specific needs in space programmes, then later saw extensive use elsewhere. What do we use every day that comes from space programmes? Everybody knows about Teflon; how many know that memory foam was invented by NASA? What other technology can we thank space programmes for?  
*Dr. JA Grier (M), Eric Choi, Dr Inge Heyer, Dr David Stephenson*
- 14:30 **Costume as narrative shorthand**  
5525 Panel 50 minutes Point Square: Odeon 4  
Good costume design is worth a thousand words. After stepping on screen or stage, but before uttering one word, a lot can be communicated about a character. A costume can express social status, education, profession, and background. From colour coding in *Elizabeth* to embroidery in *Game of Thrones* to standardisation of Kabuki costume, come and explore the power of costume design.  
*Michael Cassutt (M), Karen McWilliams, Deanna Sjolander*

From *Golden Apples of the Sun* to *Sundiver*, SF has examined missions to the Sun. How do you design a spacecraft to survive the intense environment near the Sun? How do you power it? What are we trying to learn?  
*Geoffrey A. Landis*
- 14:30 **Crediting the Illustrator**  
5522 Panel 50 minutes Point Square: Odeon 5  
All too often, only the writer is credited in the media for an illustrated book. The world of comics offers a bit more balance, but how often does an artist's name get mentioned when a book cover they illustrated is displayed? Can projects like the British campaign Pictures Mean Business help get illustrators recognised for their work? At what point of the publication process are things going wrong and how can we fix it?

Terrible because when we are finally naked in the dark and cold, it is all we have.’ Among others, Katherine Addison’s *The Goblin Emperor* and Tillie Walden’s *On a Sunbeam* explore the concept of kindness in action. - 18:00 **Ensembles in YA**  
5798 Panel 50 minutes CCD: Wicklow Hall 2B  
YA protagonists have always had supporting casts, but works like Leigh Bardugo's *Six of Crows* or *An Ember in the Ashes* by Sabaa Tahir have used ensembles to great success.  5852 Panel 50 minutes CCD: Liffey Room-2  
 Fantasy is awash with taverns, ale, and hard-drinking dwarves, which often leads to a rousing drinking song. Raise your glass as our panellists discuss the best drinking songs in fantasy and what makes for a convincing drinking song – and may even break into song themselves!  
*R.W.W. Greene (M), Anne Coleman, Rei Rosenquist, Claudia Rapp PhD*
- 19:00 **Invented mythologies in SF**  
 5840 Panel 50 minutes CCD: Wicklow Hall 2B  
 Whether it's creation myths for sentient AIs or a pantheon of alien gods, invented mythologies can add depth and weight to SF storytelling. How have myths from our own past informed the creation of fictitious mythologies in SF? Where do you start when inventing mythology? What makes a mythos convincing, and how do you subtly weave your mythology into the narrative?  
*Fonda Lee (M), Marina J. Lostetter, Adrian Tchaikovsky*
- 19:00 **Ship ahoy!**

Our panellists will define niche terms, explain why the joy of shipping isn't relegated to R- or X-rated slash fic, and share and compare their favourite genre ships.  
*Ilana Galadriel BAT (M), Gavia Baker-Whitelaw, Liekinloimu, Christopher Brathwaite*
- 19:00 **Is there any other life in the solar system?**  
 5843 Interview 50 minutes CCD: Wicklow Hall-1  
 From *Mars Attacks* to *Europa Report*, SF has speculated on the nature of other life in the solar system. What are the chances of life in the solar system beyond Earth? What would it be like? Two planetary scientists take the gloves off, with each taking a side on these questions. They will present cutting-edge data and arguments and provide time for the audience to get in on the fun.

6021 Children's Programme 120 minutes Spencer Hotel: Columba 1  
Join award-winning author Dave Rudden in a unique interactive storytelling experience where the audience becomes the hero. Each team will be cast as an adventurer – mage, warrior, rogue, barbarian – and thrown into the deepest of dungeons. Make decisions. Use magical artefacts. Create your own adventure, and win glory... or face a terrible fate. You make the choices. You write the story.  
*Dave Rudden*

*Sal Roche, John Nisbet*
- 10:00 **Bigotry is not allegorical: strategies for writing and reading**  
6057 Panel 50 minutes CCD: Wicklow Room-1  
Earlier this year, N. K. Jemisin argued for the necessity of 'blatant' depictions of bigotry in SF and fantasy: 'SFF does subtle coverage of bigotry all the time ... Allegories all over the place, especially in secondary worlds. And probably because of that, readers who are fluent in SFF are used to separating real-world bigotry from its fantastic (or futuristic) counterpart ... You cannot trust your audience to just figure that ish out.' Which books and stories function as exemplars of Jemisin's approach, and why? How should writers respond to the challenge in this argument, in their depictions of prejudice and violence? How will, and should, different readers encounter and interrogate this sort of depiction?  
*Anna Stephens (M), Jacq Applebee, Nick Wood*
- 10:00 **Women write about war**  
6033 Talk 50 minutes CCD: Wicklow Hall-1  
Science fiction and fantasy often deal with war, violence and military life. What clichés have developed in this genre, and why? And can things be done differently? Three books by women in the 21st century that deal directly with war – Naomi Novik's *His Majesty's Dragon*, Karin Lowachee's *Warchild*, and Kameron Hurley's *God's War* – present alternative visions of violent conflict and point to new ways of subverting familiar narratives.  
*Marina Berlin*
- 10:00 **No, what do you mean by AI?**  
6027 Panel 50 minutes CCD: Liffey Hall-2  
AI professionals generally consider HAL-like general artificial intelligence (the AI that worries Elon Musk) so far in the future and so poorly understood that it's useful only for philosophy and entertainment. Intelligence as we know it may be irrelevant. Neither is AI necessarily automated: there's lots of human validation in AI, in supplying training data and validating results. Panellists discuss how current and near-future states of AI differ from their fictional counterparts.

*Bonnie Gordon, Xander Jeanneret*
- 10:00 **A Critical Miss, presented by Tantalus Ireland**

 6105 Panel 50 minutes Point Square: Odeon 1  
 Whether in smart homes or wearing mechanical bodies, until recently many 'female' Als emphasised beauty and sexuality. Now some portrayals emphasise strength and intelligence. Can we do both? 'The Raksura Colony Tree' is a community art project for Dublin 2019, celebrating the worldbuilding in Martha Wells's Books of the Raksura series by creating part of a colony tree in fibre and thread. A lot of fibre arts lend themselves well to creating organic forms: trees, bushes, lianas, grass, and lots more. This is the last opportunity to bring us your contributions (you can drop them off at any time before that, of course). If you want to help us to create the final presentation out of the pieces, come by for this session!

- 10:30 **Is the future of AI in your hands?**  
6102 Workshop 50 minutes Point Square: Odeon 6 (Academic)  
Many visions for the evolution of artificial intelligence (AI) assume the transition to human-level AI will be through some physically concentrated computer. However, the evolution of animal and human intelligence is closely linked to social behaviour in its need for cooperation and communication. So might the evolution of AI also be through social engagement? Futurist John M. Smart has argued that this is indeed a likely scenario, given current technological and commercial trends toward personal AI. We are already comfortable interacting with simple voice-driven assistants, such as Siri and Alexa, both via home appliances and more significantly via the near-ubiquitous smartphone. Dedicated machine-learning acceleration chips are already starting to appear in smartphones. Here, neural nets specialising in tasks such as speech and gesture recognition can be integrated with neural nets that are continuously trained on the day-to-day experiences of users as they interact with other people and navigate their physical and virtual worlds to accomplish tasks. Such personal AI, especially if networked and able to exchange what they have learned, may rapidly evolve from today's rudimentary personal assistants to full Jarvis-like agents that will be increasingly able to converse naturally with us, anticipate our needs, and act and converse on our behalf. ADAPT, Science Foundation Ireland's research centre for Digital Content Technology, is actively researching personal AI technologies. It has organised this workshop to help imagine and debate the new ethical issues and societal impacts of personal AI on human relationships and personal autonomy. The workshop will start with a short presentation of known ethical issues before running an open group debate on the new types of responsibilities and measures that personal AI requires. We will address issues such as: Ownership of personal AI agents: what are the rights of the AI vendor and what are those of the person whose behaviour the AI has been learning?
- When a personal AI converses on our behalf, should it always declare itself as an AI?
  - After a person dies, should their family have right to their loved one's personal AI and the elements of their personality and identity it embodies?
  - If personalised AIs take on the same importance for social interactions as today's smart phones, at what age should we allow our children to start interacting with them? Should a person be free to sell their personal AI to third parties, given that it may concern knowledge of how they interact with other people?
  - In what circumstances could the authorities question a personal AI of someone accused of a crime?
  - Should a personal AI be able to contact health professionals autonomously if a person exhibits symptoms of mental or physical illness but refuses to acknowledge them? How should individuals behave if their personal AI seems to become self-aware?
- Dr Kevin Koidl, Dr Kristina Kapanova*

- 11:00 **Irish horror and the supernatural**  
6135 Panel 50 minutes CCD: ECOCEM Room  
Critic Peter Tremayne observed that: 'Practically every Irish writer has ... explored the genre for the supernatural part of Irish culture.' Ireland has always held its own infantastical literature, from Jonathan Swift and Bram Stoker to Dorothy Macardle and Elizabeth Bowen. But is there a discernible tradition threaded through their fictions? And what, if anything, makes their writing Irish?  
*RB Kelly (M), Dr Jack Fennell, Maura McHugh, Dr Tracy Fahey*

## Monday Programme Schedule

---

- 11:00 **Humorous fantasy**  
6138 Panel 50 minutes CCD: Wicklow Room-1  
Writing humour is more than dropping a brilliant one-liner into text. There is nuance and timing to consider. There are clichés and social taboos to battle... or to bat around. While wit and savvy are handy authorial tools, there is more to writing funny than snappy snark. So let's look at comedy in fiction, discussing our favourite examples and why they work so well.  
*Ellen Klages (M), Randee Dawn, Ginjer Buchanan, Ju Honisch, Angus Watson*
- 11:00 **Hungry Hippos: live action**

*Dr Sorcha O'Brien (M), Karen McWilliams, Teddy Harvia, Liz Gilio*

- 12:30 **Concert: Daoirí Farrell**  
6261 Concert 60 minutes CCD: Liffey-B (Second Stage)  
Dublin-born traditional singer and bouzouki player Daoirí (pronounced 'Derry') Farrell has been described by some of the biggest names in Irish folk music as one of most important singers to come out of Ireland in recent years. After a promising debut album, *The First Turn*, back in 2009, Daoirí spent several years studying traditional music and performance across Ireland. While at the University of Limerick, Fintan Vallely introduced Daoirí to the singing of the late Liam Weldon – an encounter that was to prove formative to his sound and his approach to folk song.  
In 2013 he won the All Ireland Champion Singer award at the Fleadh in Co. Derry, and in 2015 won the prestigious Danny Kyle Award at Celtic Connections in Glasgow with the line-up FourWinds.  
In February 2017 the BBC announced that Daoirí Farrell had received three BBC Radio 2 Folk Award 2017 nominations – more than any other artist that year. He was subsequently asked to perform at the awards ceremony on 5 April at the Royal Albert Hall in London – broadcast live on BBC Radio 2 with highlights on BBC4 TV – and went on to win the Horizon Award for best newcomer and Best Traditional Track Award for 'Van Diemen's Land' from the album *True Born Irishman*.  
His third album, *A Lifetime Of Happiness*, produced by Dónal Lunny was launched on 15 February 2019 with a sold-out show at Dublin's legendary An Góilín Club.

- 13:00 **Blowin' in the wind: SFF and counterculture**  
6321 Panel 50 minutes CCD: ECOCEM Room  
Both SFF stories and counterculture music are opportunities to imagine a different society. When they intersect they illuminate how people act in times of upheaval and change. Protest songs such as John Lennon's 'Imagine' and Simon & Garfunkel's 'The Sun Is Burning' present visions of dramatically different futures. Were the 1960s and '70s the zenith of this style of music and fiction, or are modern creators putting their own twist on this valuable expression of vision?

 Raissa Hogan, an oceanographer and PhD student, presents information on her work studying the strange wonders of deep-sea corals off Irish waters, using the Irish deep-water ROV *Holland I* during several cruises on the *Celtic Explorer* (the larger of the two state-owned research vessels run by the Marine Institute in NUIG). The data presented demonstrates that we have more diversity of deep-sea coral species in Irish waters than previously thought, and the evolution of the mitochondrial genome in *Pennatulacea* is far more varied, at least in deep-sea environments. This is based on a paper written by Raissa in conjunction with Kevin Hopkins, Chris Yesson, and A. Louise Allcock.

What's possible to make real and where might you have to make changes? How can you extrapolate what you cannot see? Panellists discuss techniques for making a two-dimensional image into something you can wear with pride.

- 15:00 **Would an Irish spaceport make sense?**  
6447 Panel 50 minutes CCD: Liffey Hall-2  
A northern spaceport makes sense for sun-synchronous polar orbits. Space station-type orbits are accessible for fly-back boosters. 6462 Panel 50 minutes CCD: Wicklow Room-2  
Over the past two decades we can observe the development of a distinct voice within Israeli genre fiction, with diversity that has a unique Israeli core. 6465 Fan Chat 50 minutes CCD: Wicklow Room-3  
Chise Hatori has lived a difficult life, due to being a Sleigh Beggy; this caused supernatural creatures to flock to her wherever she went. Just when she had decided to give up on life, she suddenly found herself in the care of Elias Ainsworth, an ancient magus... With beautiful artwork, music, and (most importantly) a very engaging story, how did the author manage to incorporate western folklore seamlessly into the narrative?  
*Sakura Perez (M)*

6477 Children's Programme 50 minutes Spencer Hotel: Columba 1

Who will capture the opposite team's flag and be declared the winners? Guns will be provided, but feel free to bring your own. This is a family event, so all children must be accompanied by an adult and all adults must be accompanied by a child – with a maximum ratio of two adults to three children.  
*John Nisbet, James Shields*

- 15:20 **Oh, the costumer and cosplayer should be friends**  
6480 Panel 50 minutes Point Square: Odeon 3  
'Costume' and 'Cosplay': are they synonyms or different entities altogether? Are we just talking about the old/new guard in costume-wearing at conventions? Are there any real differences in the costumes worn or in the types of conventions where they're worn? Panellists may not come up with definitive answers, but come along for what will hopefully be a lively conversation.
